BusinessObjects and Microsoft Critical Patches

Business Objects supports the install of all Microsoft critical patches for the operating systems listed above.

Specific Windows version have been successfully tested by Business Objects. The compatible service pack releases of the specified versions will be supported as they are made available, but may not have been tested by Business Objects. Exceptions in support will be documented.

Minimum Hardware Requirements

BusinessObjects Data Quality Management for SAP Solutions

Data Quality Management for SAP requires that you have:

- Pentium processor* with a minimum of 512 MB RAM (1 GB recommended).

RFC Server Component:

- 125 MB of hard disk space.

Data Services Data Quality XI 3.0 and greater - version 12.0.0 and greater

- All system requirements are defined within the Windows document for Data Services XI 3.

*Windows support is limited strictly to AMD/Intel chipsets. BusinessObjects Data Quality Management software for Windows is not warranted or supported for use on other chipsets.

*BusinessObjects Data Quality Management software for Windows is supported on version of Windows running on x64 CPUs made by AMD and Intell chipsets if it can reference the 32-bit operating system libraries as well as the 32-bit database and application client libraries.

Java Runtime Environment

The machine on which you install Data Quality Management for SAP Solutions must run the 32-bit version of the Java 2 Platform, Standard Edition (J2SE), version 1.5 or higher.

An installable version of the J2SE is not included with this package. You must acquire, install, and run the J2SE independently of this product and *before* the installation of Data Quality Management for SAP Solutions.

Supported Browsers

- A browser is *not* required solely for Data Quality Management for SAP Solutions.
