# mInspection: Mobile Inspection

**Industry: All (With Inspection)  Device: Android**

ARTERIA®

**Empowering Quality Inspectors to view inspection lots and report usage decisions from the field**

## Business Driver points

- The Quality Inspector will be moving around the local vendors to inspect the goods are ready for dispatch. The inspector will not be able to access the ERP to check the lots and update the same which is assigned to him.
- Warehouse in charge has to spend large amount of time in manual interactions for retrieving and updating information from/to SAP ERP instead of focusing on regular work.
- Manufacturer has to wait for the inspector to update the availability of goods to receive

## Solution Benefits

- Self service application to post the Usage decision for the inspection lots existing in ERP.
- Enhanced Customer Satisfaction: Improved response times to manufacturers with accurate info
- Automation of manual processes, manufacturer gets near real time update on time from the inspector, enables automation at remote location as well, improves efficiency
- Easy to Deploy
