“Good to know” Topics Related to SAP MDM Sizing and Performance

Applicable Releases:
SAP NetWeaver Master Data Management 5.5 SP05
SAP NetWeaver Master Data Management 5.5 SP06

IT Practice:
Data Unification

IT Scenario:
Master Data Management

Version 2.1
February 2008
These materials are subject to change without notice. These materials are provided by SAP AG and its affiliated companies ("SAP Group") for informational purposes only, without representation or warranty of any kind, and SAP Group shall not be liable for errors or omissions with respect to the materials. The only warranties for SAP Group products and services are those that are set forth in the express warranty statements accompanying such products and services, if any. Nothing herein should be construed as constituting an additional warranty.

These materials are provided "as is" without a warranty of any kind, either express or implied, including but not limited to, the implied warranties of merchantability, fitness for a particular purpose, or non-infringement. SAP shall not be liable for damages of any kind including without limitation direct, special, indirect, or consequential damages that may result from the use of these materials. SAP does not warrant the accuracy or completeness of the information, text, graphics, links or other items contained within these materials. 1. Introduction

This document provides sizing- and performance-related information for the SAP NetWeaver MDM platform. In addition, recommendations for the system landscape are given.

Sizing is not equal to performance and scalability, however good performance can only be achieved if there are no resource bottlenecks by the system and configuration of the system itself.

Besides the description of technical topics related to MDS, MDIS/MDSS, DBMS and system landscape, recommendations for data modeling are also given. A well-structured repository is crucial for ensuring excellent performance.

Note
As the way MDM handles some of the described topics will change in future releases, please check for further versions of this document.

The document can be downloaded by using the following link (SMP login required):

Tip
In case of network problems, please use the Refresh button of your browser to reload the document.

2. Prerequisites

This guide is applicable for following releases:

- SAP MDM 5.5 SP05
- SAP MDM 5.5 SP06
3. Table of Contents

Once downloaded, you will find the following topics being covered:

1 Change History
2 Related documents
3 Introduction
4 MDS
   4.1 Concurrent users
   4.2 RAM utilization for connections
   4.3 Activity
   4.4 Memory usage
   4.5 Repository load time
   4.6 Accelerator files
   4.7 Runtime/multithreading
   4.8 Steps during update and import
   4.9 Single processing capability during import and syndication
   4.10 Matching
   4.11 Searching
   4.12 MDS.ini file parameter: CPU Count
   4.13 MDS.ini file parameter: Archive Dir
   4.14 Export function in Data Manager
   4.15 32 bit applications used with the 64 bit server
5 MDIS
   5.1 MDIS.ini file parameter: Interval
   5.2 MDIS.ini file parameter: Chunk size
   5.3 Aggregation of import files
   5.4 Verbosity
   5.5 Other tips for optimizing MDIS performance
   5.6 Troubleshooting
6 MDSS
   6.1 Syndication scheduling
   6.2 Aggregation
   6.3 Minimum task delay
   6.4 Syndication remote keys
   6.5 Number of ports
7 DBMS
   7.1 CPU utilization
   7.2 Write Back Cache of DB hardware RAID
   7.3 Virtual memory consumption

8 Landscape
   8.1 Overview
   8.2 Network
   8.3 Number of servers
   8.4 System landscape for parallel and serial imports
   8.5 VM Ware
   8.6 Portal – MDM communication
   8.7 MDS – XI communication
   8.8 Operating system
   8.9 Directory of Accelerators
   8.10 Settings of OS
   8.11 Logs
      8.11.1 MDM Server 5.5
      8.11.2 MDM Syndication Server 5.5
      8.11.3 MDM Import Server 5.5
      8.11.4 MDM GUI Clients 5.5

9 Data model
   9.1 Performance considerations
   9.2 Number of main table fields
   9.3 Lookup tables
   9.4 Nested lookups
   9.5 Qualified tables
   9.6 Key mapping
   9.7 Change tracking
   9.8 Calculated fields
   9.9 Keyword index
   9.10 Multilingual
   9.11 Sort index
   9.12 Display field
   9.13 Taxonomy
   9.14 Relationships
   9.15 Workflow
