Products

BusinessObjects Metadata Management XI 3.0

This document applies only to the following Metadata Management components:

- Repository Objects
- Application Server

Metadata Integrators and Search Servers components are supported on Windows only. For more information about these components, please check the BusinessObjects Metadata Management Supported Platforms document on Windows available here:

[SAP - Business Objects Customer Support site](#)

Languages

- English only

Supported Operating Systems

- AIX 5L 5.2
- AIX 5L 5.3
- Red Hat Linux Enterprise Server 4
- Red Hat Linux Advanced Server 4
- Red Hat Linux Enterprise Server 5
- Red Hat Linux Advanced Server 5
- SuSe Enterprise Server 10

- Solaris 9 for SPARC
- Solaris 10 for SPARC

Note: The 32-bit compiled binaries of BusinessObjects Metadata Management software are supported on 32-bit and 64-bit versions of these operating system.

Minimum Software Requirements

BusinessObjects Metadata Management XI 3.0 can only be installed on top of BusinessObjects Enterprise (versions XI 3.0 FP1 and above, and XI 3.1)

Minimum Hardware requirements and Patch levels

Individual Components

- **CMS Server machine (for Repository Objects)**
Minimum hard disk space on the installation drive: 300 MB
Minimum RAM: 1 GB

- **Application Server machine**
Minimum hard disk space on the installation drive: 150 MB
Minimum RAM: 1 GB

- For information about patch levels, please refer to the Supported Platforms document for BusinessObjects Enterprise available here:

[SAP - Business Objects Customer Support site](#)

Supported Application Servers

Application Servers
Oracle Application Server 10gR3 (10.1.3)
Tomcat 5.5
Weblogic 9.2 MP2
Weblogic 10

Application Servers
WebSphere 6.0.2.9
WebSphere 6.1.0.7

JDK supported version

To see which version of the JDK is supported for each application server, please refer to the appropriate Supported Platforms document for BusinessObjects Enterprise available here:

[SAP - Business Objects Customer Support site](#)

Application Server Incremental Release Support Policy

Specified application servers versions have been successfully tested by Business Objects. Incremental releases of the specified versions defined by the last number in the application server name will be supported as they are made available, but may not have been tested by Business Objects. Exceptions in support will be documented.

Database Connectivity with BOMM repository

Database	Version	Client	BOMM Repository
IBM DB2/UDB for Unix/Linux	8.2	DB2 JDBC Universal Driver Architecture 3.3.54	X
	9.1	DB2 JDBC Universal Driver Architecture 3.3.54	X
	9.5	DB2 JDBC Universal Driver Architecture 3.3.54	X
MySQL	5.0	Connector/J 5.0.4	X
Oracle	9.2	Oracle JDBC 10.2.0.1.0	X
	10gR1 (10.1)	Oracle JDBC 10.2.0.1.0	X
	10gR2 (10.2)	Oracle JDBC 10.2.0.1.0	X
	11g	Oracle JDBC 10.2.0.1.0	X

Database Middleware Support

Interoperability combinations between 32-bit / 64-bit releases of database client / server will be supported, so long as vendor compatibility between client middleware and server is guaranteed.

Metadata Management Connectivity Notes

Metadata Management Database Connectivity Support policy

BusinessObjects Metadata Management RDBMS support is defined by the version of the database client interface. Any database client interface supported by Metadata Management will be supported in any client-server combination which is supported by the database vendor. If a vendor announces that they will discontinue support, Metadata Management must discontinue on-going support for that database.

Metadata Management supports all client interfaces listed in this document and client interfaces that are compatible with versions listed.

Unless explicitly stated otherwise, all database versions refer to the generally available versions provided by the vendor for an "x.x" release.

Finding More Information

For more information and resources, refer to your product technical documentation and visit the support area of the Business Objects web site at the [SAP - Business Objects Customer Support site](#)
