Introduction

This version of the document may be intermittently updated online with the latest information after the original release of BusinessObjects Data Quality XI for Informatica PowerCenter 8.1. For the most recent version, please check the [Business Objects Customer Support site](#).

NOTE

Anything that is highlighted using red font indicates that it is an update, addition or correction made after the original release of the Supported Platforms document that was published with this product.

Products

BusinessObjects Data Quality XI for Informatica 11.7.0

This information is specific to the Informatica DQ connector version 11.7.0.

Important - This connector ships with Data Quality XI version 11.7.0.

Languages

English only.

Supported Operating Systems

Data Quality XI for Informatica – server plug-in

- HP-UX 11.11 (PA-RISC) 32-bit
- HP-UX 11.23 (Itanium) 64-bit

Data Quality XI for Informatica – client plug-in

- Windows 2000 SP4 Professional
- Windows XP SP2 Professional

Minimum Hardware Requirements

BusinessObjects Data Quality XI for Informatica

The Data Quality XI for Informatica plug-in requires that you have:

- Processor* with a minimum clock speed of 1 GHz or a RISC processor of comparable power.

Data Quality plug-ins:

- The DQ plug-in* for Server - must be installed to the same machine / OS that hosts Informatica PowerCenter.

- The DQ plug-in for Client - must be installed to the Windows client machine(s).

Data Quality XI Release 2** - version 11.7.0.

- Data Quality XI should be installed on a different machine than that which hosts Informatica PowerCenter. All system requirements are defined within the HP-UX document for Data Quality XI.

* The DQ Plug-in for Informatica server on HP-UX is built as both 32-bit and 64-bit binaries.

**The Data Quality XI Server is built as a 32-bit binary but has been certified to run on the HP-UX for PA-RISC 64-bit platform only. The BusinessObjects Data Quality Server and web tier components for Windows can be run on Windows 64-bit operating systems on Intel/AMD chipsets if it can reference the 32-bit operating system libraries as well as the 32-bit database and application client libraries. Windows support is limited strictly to AMD/Intel chipsets.

Business Objects and Microsoft Critical Patches

Business Objects supports and recommends installation of all MSFT critical patches for the operating systems listed above.

Business Objects and HP-UX Critical Patches

HP-UX 11.23 (PA-RISC): Patch 34944 is required to run DQ XI. Some environment variables are also required to be set once this patch is applied. More information on configuration is included in the DQXI Administrators Guide.

Enterprise Application Support

Data Source	Version	Client	Repo	Source	Target
Informatica PowerCenter	8.1.x	N/A		x	x

C++ Runtime Library

You must install the HP-UX C++ runtime environment version A.03.26 or later. To learn more and download this runtime environment, go to <http://docs.hp.com/en/5187-2783/ch15s03.html>.
