The Item Cost (Standard) is not Equal to the Cost in the Stock Revaluation, Why and How is it Verified?

It is possible that the item is, or was previously, managed by warehouse. Therefore, the standard cost price will be specific to the warehouse. The price is coming from OITW (Warehouse table) and not from OITM (Item Master Data table). Hence, each warehouse has its own standard cost other than the cost defined in the Item header.

To verify the standard cost price of the item in each warehouse, generate the Stock Posting List. (Stock Management - > Stock Reports -> Stock Posting List)

To list the items which have standard cost discrepancies, between the Item header in the Item Master Data and in the warehouse, use the query to show these differences between OITW and OITM.

```
SELECT distinct
    T0.[ItemCode],
    T0.[WhsCode],
    T0.[AvgPrice],
    T1.[AvgPrice][cost on header]
FROM
    OITW T0
    INNER JOIN
    OITM T1 ON
    T0.ItemCode = T1.ItemCode
WHERE
    T1.[EvalSystem] ='S' and
    T0.[AvgPrice]<> T1.[AvgPrice]
```
