## Welcome to the SAP Portal Content Portfolio!

[Portal Content in SAP Service Marketplace](#) // [SAP NetWeaver Portal in SAP Service Marketplace](#) // [Product Availability Matrix for Portal Content](#)

The Portal Content Portfolio is your location for downloading predefined, packaged portal content to speed up your portal implementation. This business content consists of iViews bundled into hundreds of role-specific business packages based on solutions from SAP.

You can browse the portfolio according to user roles. By then clicking a title in the resulting list of packages, you receive additional details about that package. To download portal content, click on the Download link for the respective list entry. Please note that SAP Service Marketplace login is required for this.

**If you encounter an error page after Service Marketplace login, please check with your account manager if you have the license (s) required for the respective business package.**

Portal content developed by partners is available via the [Partner Directory](#).

Categories: [Business Packages for Every User](#) | [Business Packages for Managers](#) | [Business Packages for Specialists](#)

Download	Title	Release	Availability
	<a href="#">Business Package for Design Collaboration</a>	60.1	Unrestricted Shipment
	<a href="#">Business Package for DMS Connector for KM</a>	1.0	Unrestricted Shipment
	<a href="#">Business Package for Employee Self-Service (mySAP ERP 2004)</a>	60.2	Unrestricted Shipment
	<a href="#">Business Package for Employee Self-Service (mySAP ERP)</a>	1.0	Unrestricted Shipment

...familiar URL...

...new format!

**The Portal Content Portfolio (PCP) on SAP Developer Network (SDN) is the location for browsing and downloading portal content (iViews) bundled as business packages:**

**<https://www.sdn.sap.com/irj/sdn/developerareas/contentportfolio>**

**With the beginning of 2007, the catalog has become available in a new, slim format. It now contains:**

- **Listings for portal content developed by SAP**
  - **Downloadable from Software Distribution Center in SAP Service Marketplace**
  - **Detailed information available via the Product Availability Matrix**

## What about 3rd party business packages?

All partner content listings are available from the consolidated  
Partner Directory:

<http://www.sap.com/partners/directories/searchpartner.epx>

The Partner Directory offers a consolidated view on all partner activities and products. It now also contains:

- Listings for portal content developed by partners
  - Downloadable from the respective vendor's web site
- List of system integrators for portal content

# Searching for Portal Content in the Partner Directory

The screenshot shows the SAP Partner Information Center search page. The left sidebar contains navigation links: SAP.com Home, Industries, Solutions, Small Business Solutions, Services, Platform, Partners, Global & Local Partner Directories, Partner Categories, How to Partner with SAP, Integration & Certification, Safe Passage Partner Initiative, SAP Partner Portal, Communities, Our Company, Careers, and Contact SAP.

The main search area is titled "Partner Information Center: Search" and has two tabs: "Search for Partners" (selected) and "Search for Solutions".

Search criteria include:

- Solution Name:** Text input field.
- Company Name:** Text input field.
- Country:** Dropdown menu set to "All Countries".
- SAP-Defined Integration Scenarios:** List of scenarios including AC-CCI 1.0, AII-DC-RFID 1.0, AII-RH 1.0, B2B-OCI 1.0, B2B-OCI 2.0, B2B-OCI 3.0, B2B-OPI 1.0, BC-AL 3.1, and BC-AL 4.5.
- Third-Party Defined Integration Scenarios:** List of scenarios including B1 SDK 6.5, BUSINESS INTEL - SAP NetWeaver Business Intelligence, EP-BP 6.0 - Enterprise Portal Business Packages 6.0, FINANCIALS - mySAP Financials, HEALTHCARE - SAP for Healthcare, HUMAN RESOURCES - mySAP Human Resources, J2EE-DEP 6.20, J2EE-DEP 6.40, and J2EE-DEP 7.0.
- Certification Category:** List of categories including Encryption, Enterprise Portal iViews, Environmental safety, Error-tolerant search, Exchange Infrastructure third-party adapter, Exchange Infrastructure content, Export document printing, Express delivery, and Express shipping.
- Partner Type:** Dropdown menu set to "All Partner Types".
- Qualification:** Checkboxes for "Powered by SAP NetWeaver" and "Certified for SAP NetWeaver".

Annotations with arrows point to specific elements:

- A box labeled "Select „EP-BP 6.0 – Enterprise Portal Business Packages 6.0“" points to the "EP-BP 6.0 - Enterprise Portal Business Packages 6.0" entry in the Third-Party Defined Integration Scenarios list.
- A box labeled "Select „Enterprise Portal iViews“" points to the "Enterprise Portal iViews" entry in the Certification Category list.
- A box labeled "Search" points to the "Search" button at the bottom of the form.

At the bottom right, there is a "20 results per page" dropdown menu.

**The certification program will continue to exist.**

**More information on the certification process for portal content is available in the Partner section on SDN:**
