Introduction

This version of the document may be intermittently updated online with the latest information after the original release of BusinessObjects Data Quality XI for Oracle E-Business Suite. For the most recent version, please check the [Business Objects Customer Support site](#).

NOTE

Anything that is highlighted using red font indicates that it is an update, addition or correction made after the original release of the Supported Platforms document that was published with this product.

Products

BusinessObjects Data Quality XI for Oracle E-Business Suite 11.7.0

This information is specific to the Oracle EBS DQ connector version 11.7.0.

Important - This connector ships with Data Quality XI version 11.7.0.

Languages

English only.

Supported Operating Systems

Data Quality Servlet for Oracle E-Business Suite

- Solaris 8 (32-bit / 64-bit)
- Solaris 9 (32-bit / 64-bit)
- Solaris 10 (32-bit / 64-bit)

Data Quality XI Client Application - Windows

- Windows 2000 SP4 Professional
- Windows XP SP2 Professional

Minimum Hardware Requirements

The Servlet for Data Quality XI for Oracle E-Business Suite requires that you have:

- Processor* with a minimum clock speed of 800 MHz.

Data Quality Connector Servlet:

- The DQ Servlet must be installed to a different machine than hosts Oracle E-Business Suite.

Data Quality XI Release 2** - version 11.7.0.

- All system requirements are defined within the Solaris document for Data Quality XI.

* The DQ Servlet for Oracle EBS and the Data Quality XI Server is built as a 32-bit binary but has been certified to run on this 64-bit platform. The BusinessObjects Data Quality Server and web tier components for Windows can be run on Windows 64-bit operating systems on Intel/AMD chipsets if it can reference the 32-bit operating system libraries as well as the 32-bit database and application client libraries.

**Windows support is limited strictly to AMD/Intel chipsets.

Business Objects and Microsoft Critical Patches

Business Objects supports and recommends installation of all MSFT critical patches for the operating systems listed above.

Business Objects and Solaris Critical Patches

Business Objects supports and recommends installation of all Solaris critical patches for the operating systems listed above.

Enterprise Application Support

Data Source	Version	Client	Repo	Source	Target
Oracle E-Business Suite	11.5.10 with Oracle Applications patch # 5915835	N/A		x	x

Web Server Connectivity

You must have a web server and a Servlet container, or a web server that natively supports servlets, on the same machine which you intend to install this DQ Servlet. The following list shows some examples of Servlet containers certified for this product.

- Apache Tomcat 5.x or higher
- IBM WebSphere 6.x or higher

Java Requirements

The machine on which the Servlet is installed must run the following Java software. This software package must be acquired and installed on the same machine that will host the Servlet:

- Java 2 Platform, Standard Edition (J2SE) version 1.4.2 or higher.
