## Introduction

This version of the document may be intermittently updated online with the latest information after the original release of BusinessObjects Data Integrator XI Release 2 Accelerated. For the most recent version, please check the [Business Objects Customer Support site](#).

**NOTE**

Anything that is highlighted using red font indicates that it is an update, addition or correction made after the original release of the Supported Platforms document that was published with this product.

## Products

### BusinessObjects Data Integrator XI Release 2 Accelerated

This information is specific to Data Integrator version 11.7.2.3.

## Languages

English only.

## Supported Operating Systems

- AIX 5.2 64-bit
- AIX 5.3 64-bit

To know which Operating Systems are supported on the Data Integrator Client, please refer to the Windows Supported Platforms document available on the [Business Objects Customer Support site](#).

## Minimum Hardware Requirements

### Data Integrator Designer

- Pentium processor\* with a minimum of 512 MB (1 GB recommended) RAM and 700 MB free disk space
- Screen resolution of 1024 x 768 pixels with 16-bit or 65536 colors recommended (minimum 256 colors)
- Operating system paging file with a minimum setting of 512 MB (1 GB recommended)

### Data Integrator Job Server

- PowerPC processor with a minimum of 512 MB RAM (1 GB recommended) RAM and 800 MB free disk space
- 1 GB virtual memory
- Recommended for best performance: dual processors (minimum 500 MHz) with at least 512 MB physical memory
- Operating system paging file with a minimum setting of 256 MB
- Recommended pageable cache directory size (2GB)

## Data Integrator Access Server

- PowerPC processor with a minimum of 512 MB RAM (1 GB recommended) RAM and 800 MB free disk space
- 1 GB virtual memory
- Recommended for best performance: dual processors (minimum 500 MHz) with at least 512 MB physical memory
- Operating system paging file with a minimum setting of 256 MB
- Recommended pageable cache directory size (2GB)

## Data Integrator Management Console

- PowerPC processor with at least 512 MB RAM (1 GB recommended) and 150MB free disk space

## Patch Level for AIX

For all versions of AIX, the following file sets must be installed:

<b>NOTE</b>	The AIX maintenance level must be at least 5200-05.
-------------	---

File set	Level	State	Description
xlC.aix50.rte	6.0.0.13	Committed	C Set ++ Runtime for AIX 5.0

## Data Integrator Connectivity Notes

### Data Integrator Database Connectivity Support policy

BusinessObjects Data Integrator RDBMS support is defined by the version of the database client interface. Any database client interface supported by Data Integrator will be supported in any client-server combination which is supported by the database vendor. If a vendor announces that they will discontinue support, Data Integrator must discontinue on-going support for that database.

Data Integrator supports all client interfaces listed in this document and client interfaces that are compatible with versions listed.

Unless explicitly stated otherwise, all database versions refer to the generally available versions provided by the vendor for an "x.x" release.

### Data Integrator Database Connectivity Limitation

Due to the driver limitation of supporting multiple connections, the following RDBMS are not supported with Data Integrator through DataDirect Technologies ODBC Connect Driver on UNIX: DB2, AS/400, and Btrieve.

### Data Integrator Technology Connectivity

Data Integrator supports XML Schema version 1.0 as defined by W3c.org.

Data Integrator supports SNMP version 3 except encryption.

### Data Integrator with JD Edwards Applications

If the Data Integrator server is on AIX, JDE One World is only supported with source database MSSQL, Oracle, and mainframe.

If the Data Integrator server is on AIX, and JDE World is using DB2/AS400, connection must be made through iSeries Access.

## Data Integrator with Oracle Applications

All Oracle database versions supported by Oracle Applications 11i or 12i can be used as source for Rapid Marts for Oracle Applications.

## Data Integrator with PeopleTools

PeopleSoft 8 support is implemented for Oracle only. The version of the Oracle client connecting to the underlying PeopleSoft database must be supported by Data Integrator.

## Data Integrator with Siebel

Siebel support is implemented for SQL Server, DB2, and Oracle only. The version of the database client connecting to the underlying Siebel database must be supported by Data Integrator.
