## New Partners in the Global Security Alliance

SAP Consulting is pleased to announce additional members to the Global Security Alliance: IBM, Deny All, and Sun Microsystems.

### IBM

IBM Tivoli security management solutions address two critical e-business challenges: automated identity management and security event management. The IBM Tivoli identity management solution helps organizations quickly realize ROI by bringing users, systems and applications online fast, while effectively managing users, access rights and privacy preferences throughout the identity lifecycle. The IBM Tivoli security event management solution helps organizations actively monitor, correlate and quickly respond to IT security incidents across their e-business. Through this partnership, our international customers can benefit from our efforts in providing comprehensive and best practice security solutions.

### Deny All

Deny All has joined the GSA as a new partner with best-practice solutions in the area of Web-application firewalling. Société Générale, the French bank, commenced activities in this field more than nine years ago and the solutions have been in use for the past eight years. This business area was spun off to become an independent company in 2001. Deny All is now globally active as a provider of excellent solutions to protect Web and XML based applications. The company's references include international enterprises in all fields of business, e.g. finance, public sector, and industry. Especially in combination with SAP products, Deny All's clients report that they have had very good experiences with the "rWeb," "sProxy", and "rFTP" solutions. We are pleased that the partnership with Deny All will now enable us to offer even stronger protection in Web-based scenarios. Contact person at SAP Consulting is Christian Wippermann ([christian.wippermann@sap.com](mailto:christian.wippermann@sap.com)).

### Sun Microsystems

Sun™ Java System Identity Manager delivers a centralised user management, password management and profile management. It provides access credentials for all applicable systems to all enterprise users and fully automated assigns their IDs to accurate rolebased profiles.

## CyberSafe TrustBroker™

The CyberSafe TrustBroker™ Adapter product was recently SAP certified, and achieved Powered by NetWeaver status. This product provides Integrated Windows Authentication, and Secure Single Sign-On for SAP NetWeaver applications such as SAP NetWeaver Portal, SAP GUI for HTML, or BSP Applications. The Integrated Windows Authentication means that a user can authenticate against their Microsoft Active Directory domain when they logon to their Windows workstation, and the Kerberos credentials issued are then used to authenticate the user to SAP NetWeaver. For more information, please visit the CyberSafe website at

<http://www.cybersafe.com/links/adapter.htm>.

## Events

The first **Secologic Info Day** is to start on **March 15** at 9:45 a.m. in Frankfurt, Steigenberger Hotel. Focusing on "Security in the software development lifecycle" all partners of the Secologic Project will present their results. Further information about the whole project and registration information can be found at <http://www.secologic.com/>

**March 27 - 29**, don't miss the opportunity to update your knowledge at the **SAP NetWeaver BI and Portals Conference** in Las Vegas. Security specialist Gerlinde Zibulski will lecture on Monday, March 27, 2:45 pm - 4:00 pm on "SAP NetWeaver authentication and SSO: A comprehensive overview" and on Tuesday, March 28, 2:15 pm - 3:30 pm about "An introduction to user and access management with SAP NetWeaver". On Monday and Tuesday evening you can also meet her personally at the UPI booth. Check out the whole agenda at <http://www.sapnetweaver2006.com/>

**March 28 - 29, D-A-CH Security Conference in Düsseldorf**, Guido Wagner from SAP will lecture on "EIM (Enterprise Integrity Management) - Darstellung des unternehmensweiten Sicherheitsstatus". The conference is held in German. More information and registration at <http://syssec.uni-klu.ac.at/DACHSecurity2006/>

Mark your calendars: On **May 14 - 17** the **annual ASUG conference** will take place in Orlando, Florida. SAP security will be represented with several sessions. Details soon to come. <http://www.asug.com/events/asug2006/>

In parallel you will have the opportunity to register for **SAP SAPPHERE in Orlando**, May 16 - 18. More information at <http://www1.sapsapphire.com/usa2006/index.epx>.

The **European SAPPHERE** will take place in Paris, May 30 to June 1st. More information at <http://www.sapsapphire.com/emea2006/index.epx>.

Keep yourself informed about news on the upcoming **SAP TECHED** events at <https://www.sdn.sap.com/irj/sdn/sapteched>. This year's SAP TECHED will take place in

Las Vegas, Nevada: 12 - 15 September

Amsterdam, Holland: 18 - 20 October

Bangalore, India: 8 - 10 November
