

SAP (Web) Console 7.10

Release Notes

New features in Release 7.10 of SAP (Web) Console:

- SAP (Web) Console is now a standalone component that can be used without having to install SAP GUI for Windows on your server.
- The new version of the SAP (Web) Console installation ("NetWeaver SAP SETUP") provides the new standard for deployment of all SAP desktop applications. The installation server features include the ability to manage all SAP components, i.e. SAP (Web) Console, SAP GUI, Business Intelligence (BI) Frontend etc. In sum, with the new NetWeaver SAP SETUP you can use a single tool to manage the lifecycle of all SAP components on your workstations.
- SAP (Web) Console 7.10 has an own lifecycle and receives updates via dedicated patches which can be downloaded from the SAP Service Marketplace.
- SAP (Web) Console 7.10 comes with a comprehensive Installation & Configuration Guide.
