Note: \*1 When installing Holos against Sybase 10 or Ingres 6 on either a Dynix/PTX v2 or v4 platform you must install from the DYNIX2 tape.  
\*2 Apart from AT&T, Teradata is only supported via customised gateways. Currently we only support such a gateway on the Sun.  
\*3 Columns shown as 'not supported' implies that no testing has been carried out, if required please contact us.

<b>Platform:</b>	<b>Database:</b>	<b>ORACLE</b>	<b>NT ODBC Driver Manager</b>	<b>MS SQL Server</b>
INTEL NT		7.3.2.1.1	3.00	6.5 *5
		7.3.2.2.1 *4	3.00	6.5 *5
ALPHA NT		<b>7.2.4.4.1</b>	2.50	6.5 *6
		<b>7.2.4.4.1</b>	2.50	6.5 *6

\*4 Oracle 7.2 will not work with NT versions. For 7.3 the support files for Oracle 7.1 and 7.2 must also be installed via the Oracle Custom install

\*5 Using MS ODBC SQL Server Driver 2.65.0213

\*6 Using MS ODBC SQL Server Driver 2.65.0240

<b>Database connection via ODBC under Unix using Visigenic ODBC- Driver Manager and Driver Set 02.00.0000</b>					
This table represents Operating System and Database versions, where testing has been satisfactory completed. We expect other combinations to work, but as yet testing has not been completed.
