

Operational Analytics with ODP

Configuring Operational Data Provisioning

September 2011

Objectives

At the end of this module, you will be able to:

- Perform the necessary configuration steps

Configuring Operational Data Provisioning

The IMG structure for Search and Operational Analytics includes settings for the following use cases:

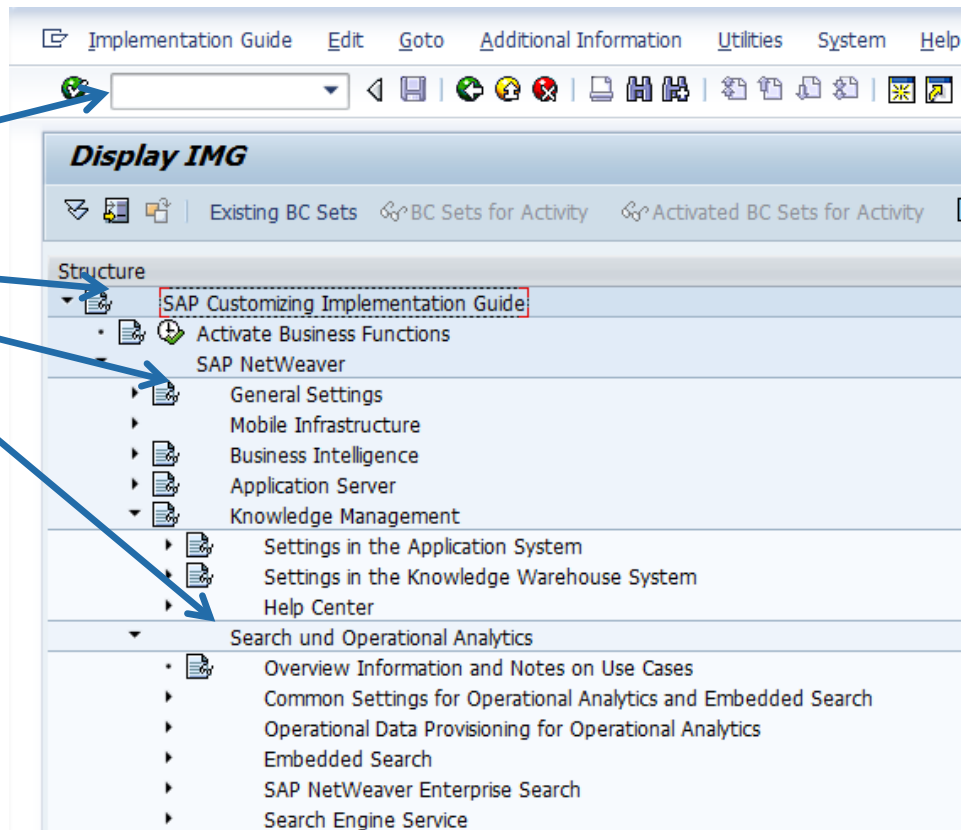

- Operational Data Provisioning for Operational Analytics
- Embedded Search

Configuring Operational Data Provisioning

Configuration Screen

Steps to navigate to configuration screen

- Run transaction *SPRO*
- Click *SAP Reference IMG*
- Navigate to *SAP NetWeaver* and click
- Navigate to *Search and Operational Analytics* and click

Configuring Operational Data Provisioning

Common Settings for Operational Analytics and Embedded Search

Assign Administrator Role

- This composite role and the roles contained in it provide the various authorizations required for configuration changes and administration tasks.

Activate Web Dynpro Services

Configure TREX and Indexing

- To allow TREX/BWA and SAP NetWeaver to communicate with one another, you must create a connection between them, take care of load balancing and specify users for real time indexing

Refer to online help () for parameters to be set

Configuring Operational Data Provisioning

Configure Settings for Operational Analytics

Basic Configuration for Operational Analytics

- This allows you to use Operational Data Provisioning and Classic InfoSets in BI tools.

Specify Client for Modeling

- Use this step to specify the RFC destination that is used to read the ODP modeling. This allows you to run the query on other clients as well.

BAdI: Processing of DataSource Enhancements

- With this Business Add-In you can use the Data Source Extension for Operation Data Provider

Refer to online help () for parameters to be set

Summary

You should now be able to

- Perform the necessary configuration steps
