SAP BusinessObjects Lifecycle Management Integration with SAP CTS+

CTS

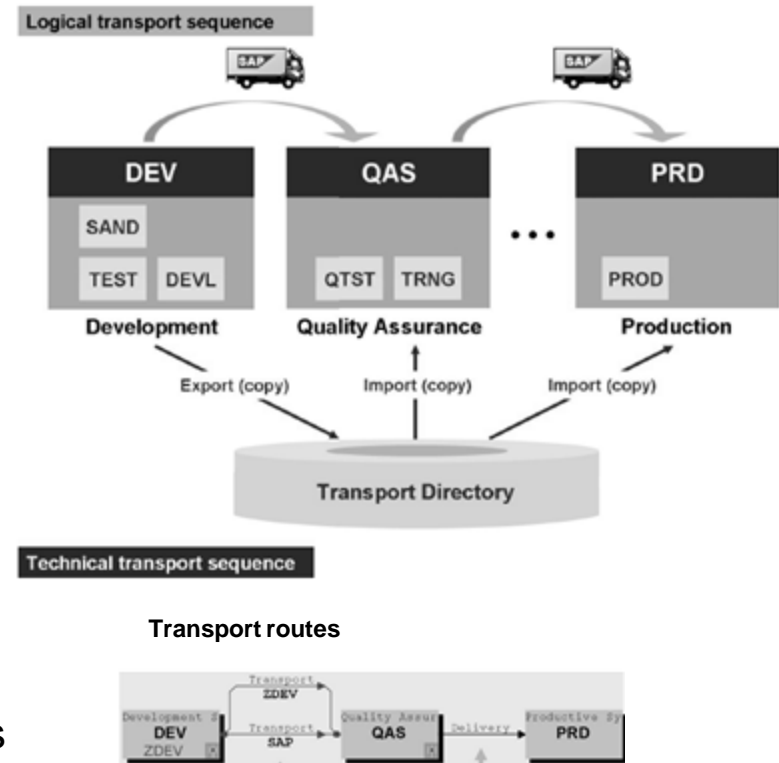

- Change and Transport System
- To synchronize content in SAP ABAP deployments

CTS+

- Enhanced Change and Transport System
- Used to transport non ABAP objects

TMS

- Transport and Management System
- Transaction STMS
- Define transport domains and transport routes
- Transport all changed objects from one system to another.
- Transport organizer

SAP BusinessObjects Lifecycle Management Integration with SAP CTS+

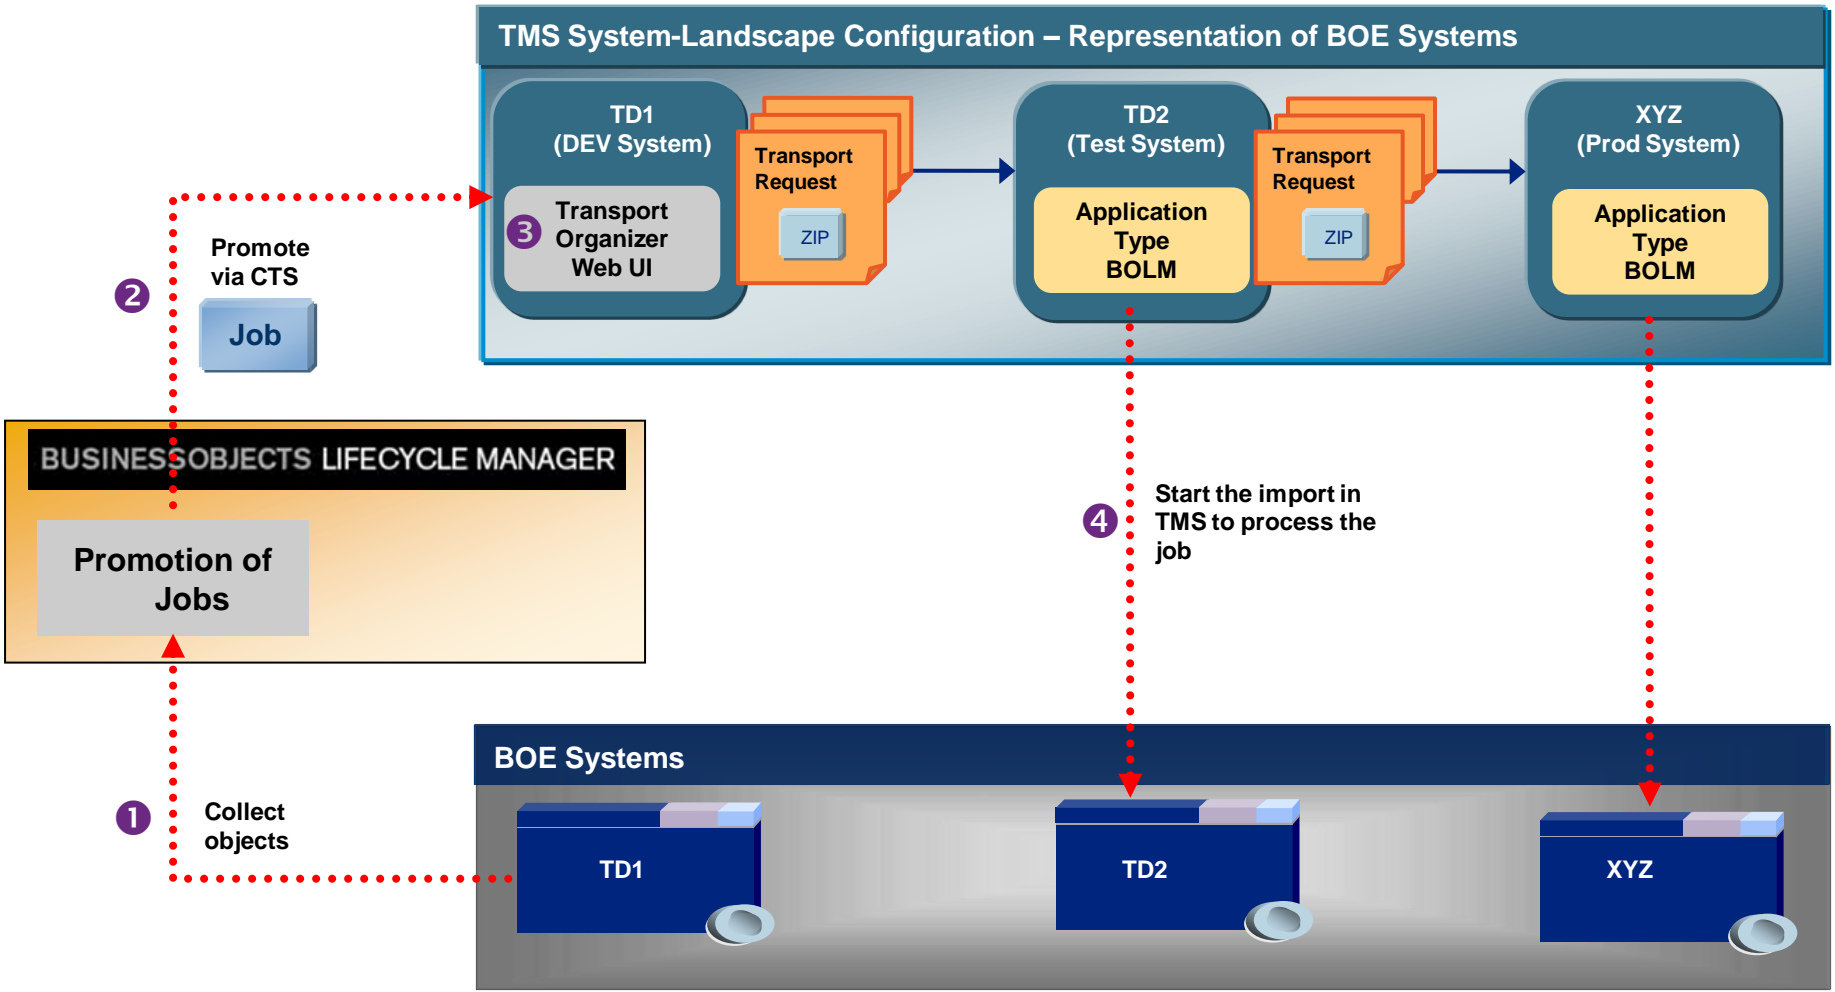

LifeCycle Manager is a Web-Based tool that enables you to

- Promote Business Intelligence resources from one BusinessObjects system to another BusinessObjects system
- Manages dependencies of BI resources
- Rollbacks a promoted resource to restore the destination system to its previous state
- Manages different versions of BI resources
- No additional licensing required
- Available now at the SAP Service Marketplace extranet

SAP BusinessObjects Lifecycle Management

Integration with SAP CTS+

Change(s) made in SAP BusinessObjects 4.0 Development system

Lifecycle Manager used to:

- Collect changed objects & any required internal dependencies into “Promotion Job”
- Associate any external dependencies with the promotion job (e.g. BEx Queries)
- Assign Promotion Job to Transport Request
- Export to CTS+ consolidation environment

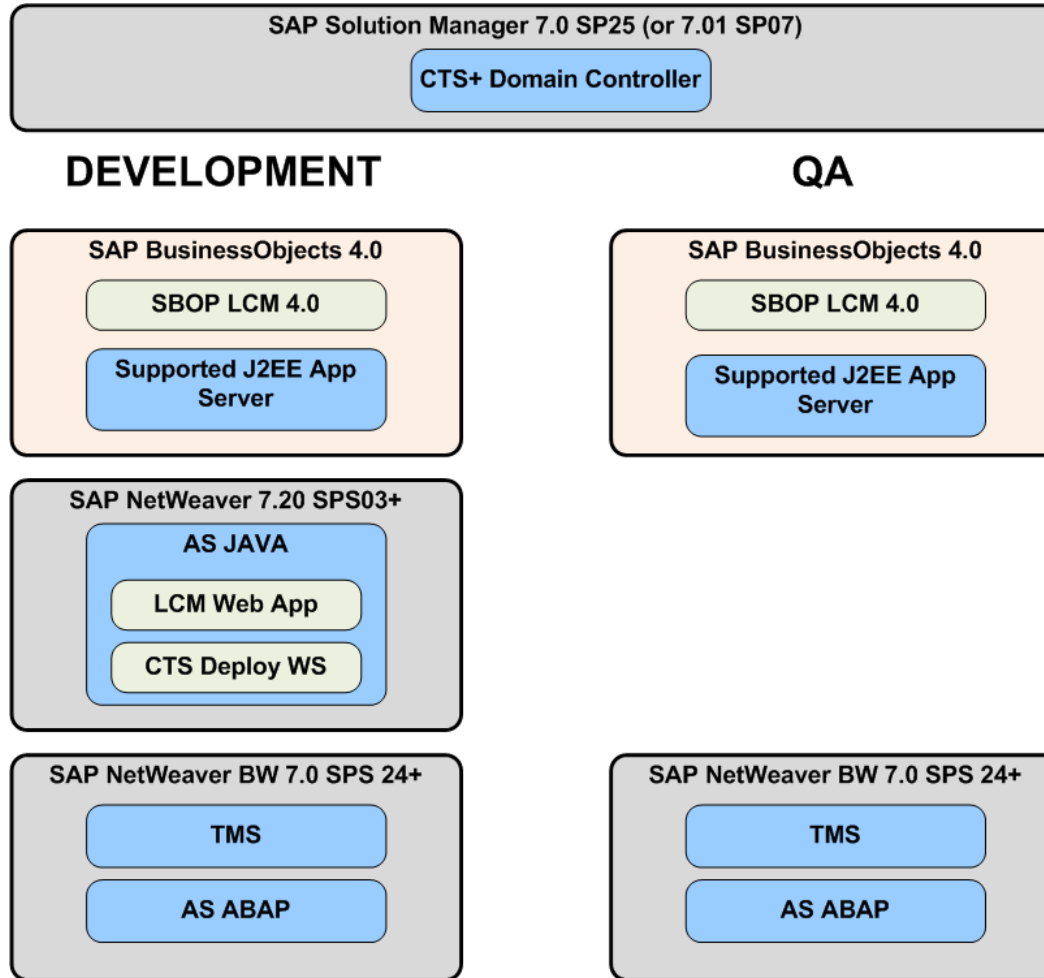

Transport Request is being released. CTS+ transports objects via Transport Routes to various Transport nodes (destination systems)

Lifecycle Manager import plug-in called at destination & changes committed to destination system (>> SAP BusinessObjects Enterprise 4.0)

- All objects committed with administrator credentials
- Overrides to database connections are applied based on override table at destination system
- Related objects (e.g. BW) committed to appropriate destination as well
