

SAPUI5 Developer Studio

Agenda

Overview

Installation

Overview

Overview

SAPUI5 Developer Studio is a set of tools for Eclipse that greatly simplify the development process for SAPUI5 applications and controls, including:

- Wizards for project and view/controller creation
- Wizards for control development
- Code Completion for SAPUI5 controls
- TeamProvider for BSP repositories
- Application preview with an embedded Jetty server
- Proxy-servlet to prevent cross-site-scripting errors

Installation

Installation 1

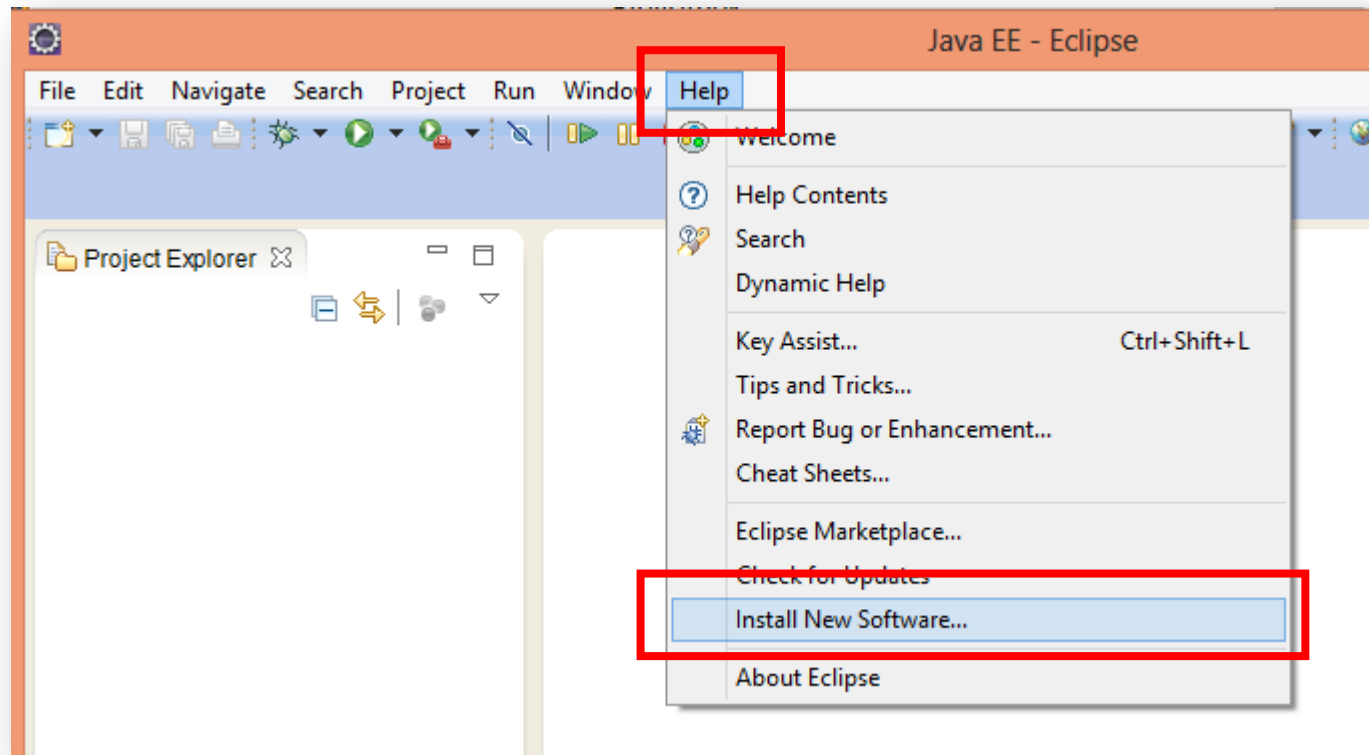

- **Prerequisite:** Install the latest Java Development Kit 6, if it is not installed already.
- **Download Eclipse Juno (version 4.2 or higher)**

The full installation information is available at SAP Development Tools for Eclipse at:

<https://tools.hana.ondemand.com/#sapui5>

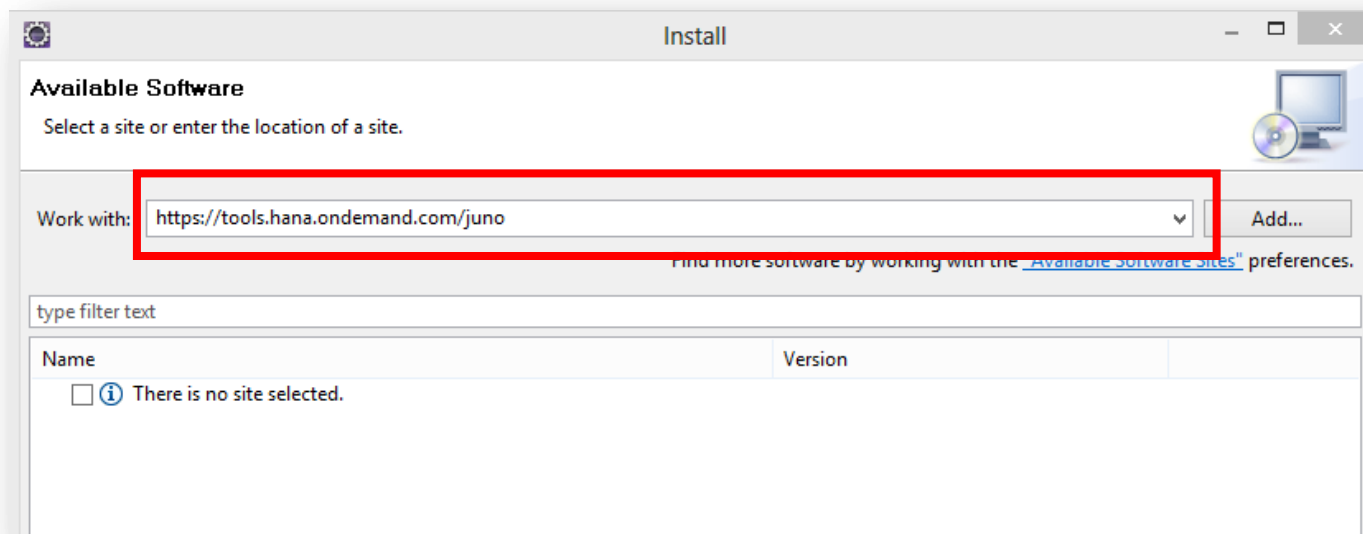

Installation 2

- Start Eclipse and choose in the menu bar **Help > Install New Software...**

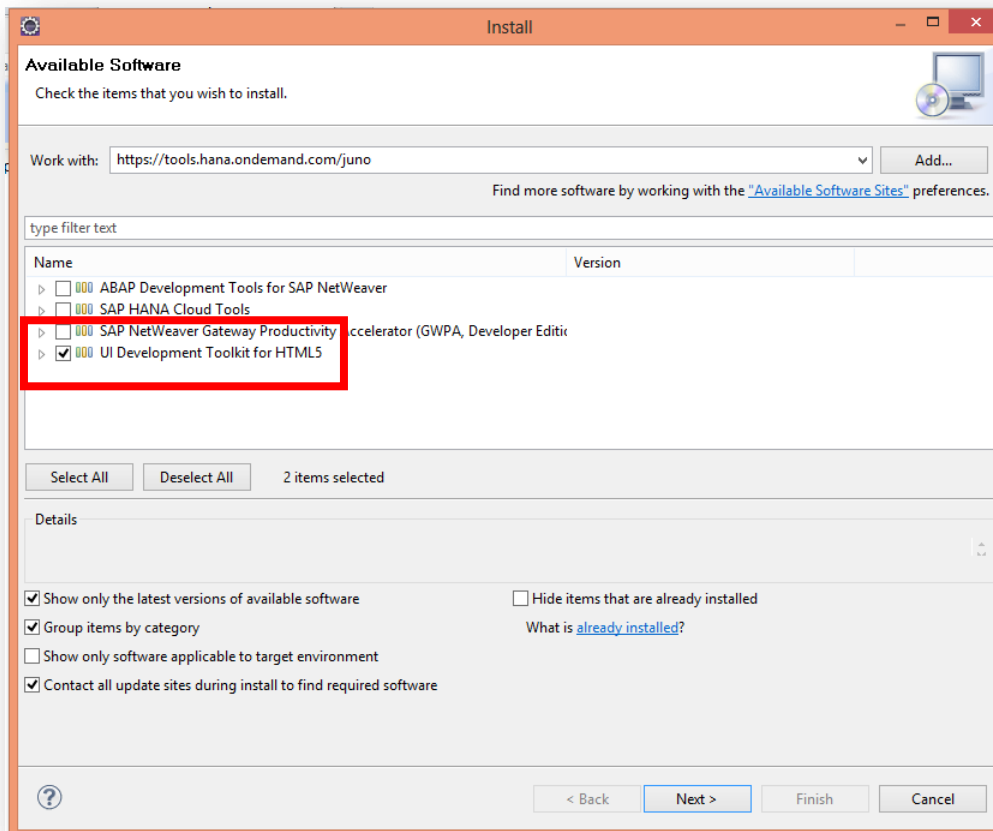

Installation 3

- In the Install dialog, enter the update site URL **https://tools.hana.ondemand.com/juno** in the **Work with** entry field.

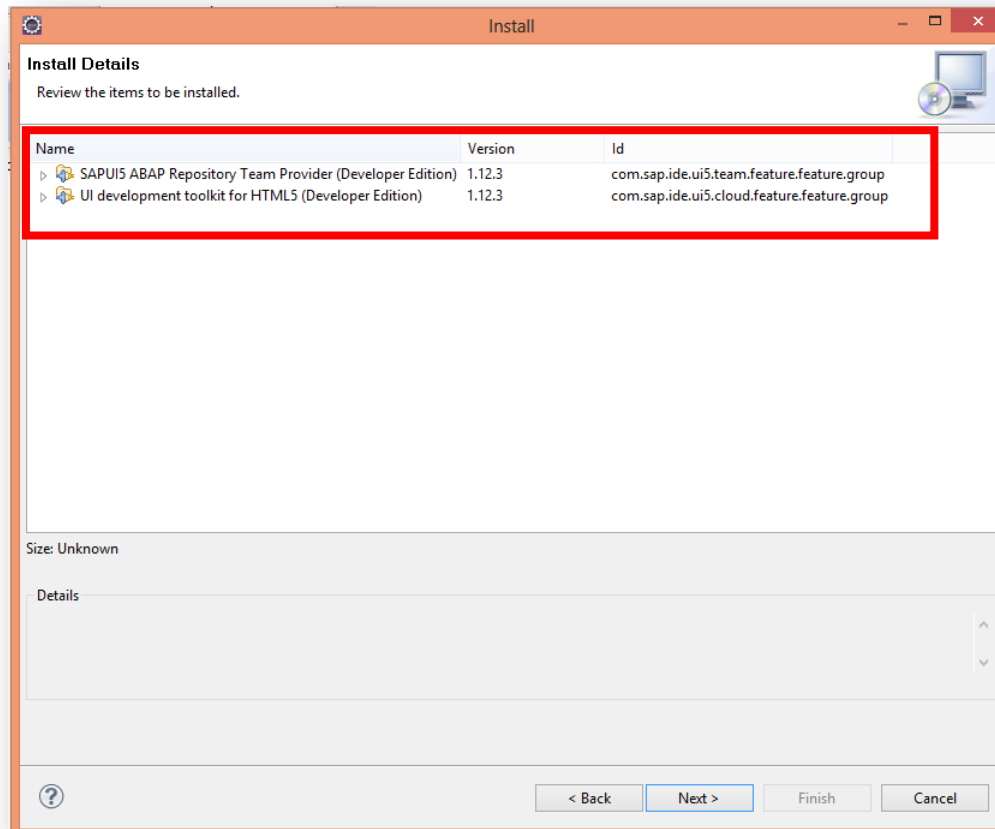

Installation 4

- Press **Enter** to display the available features
- Select the desired features under **UI Development Toolkit for HTML5** and choose Next.

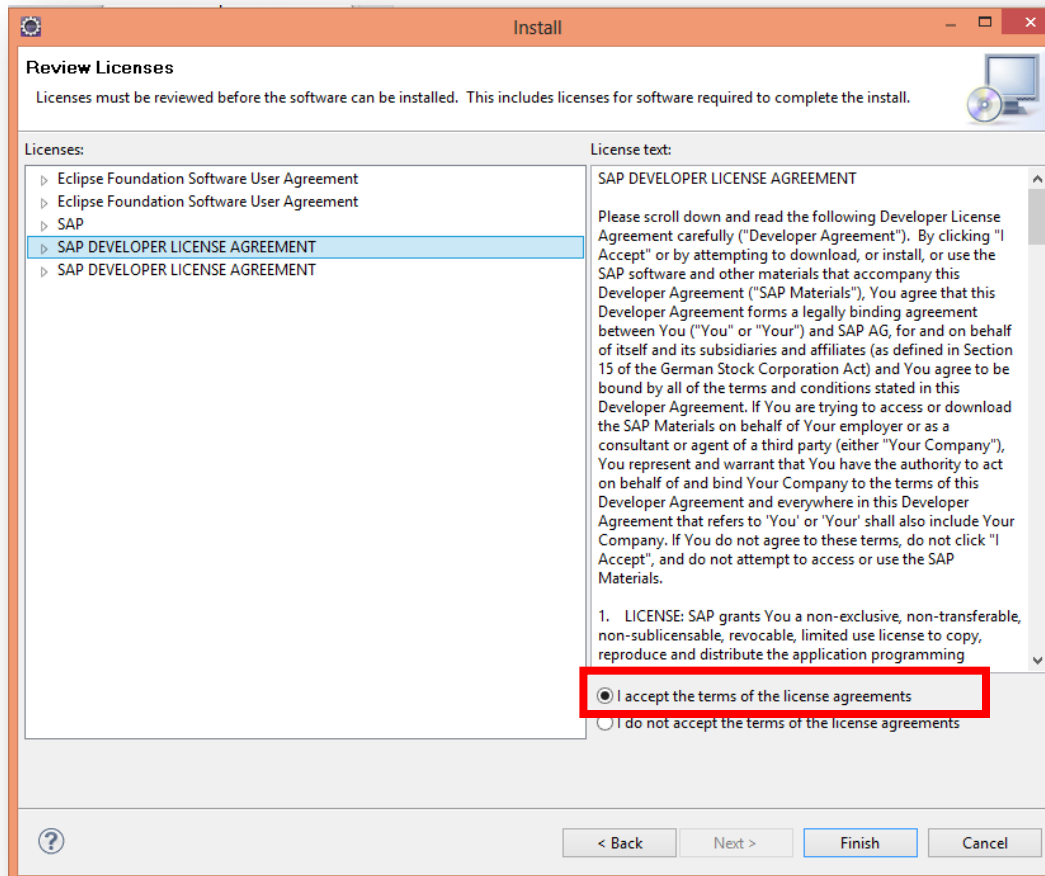

Installation 5

- On the next wizard page, you get an overview of the features to be installed. Choose **Next**.

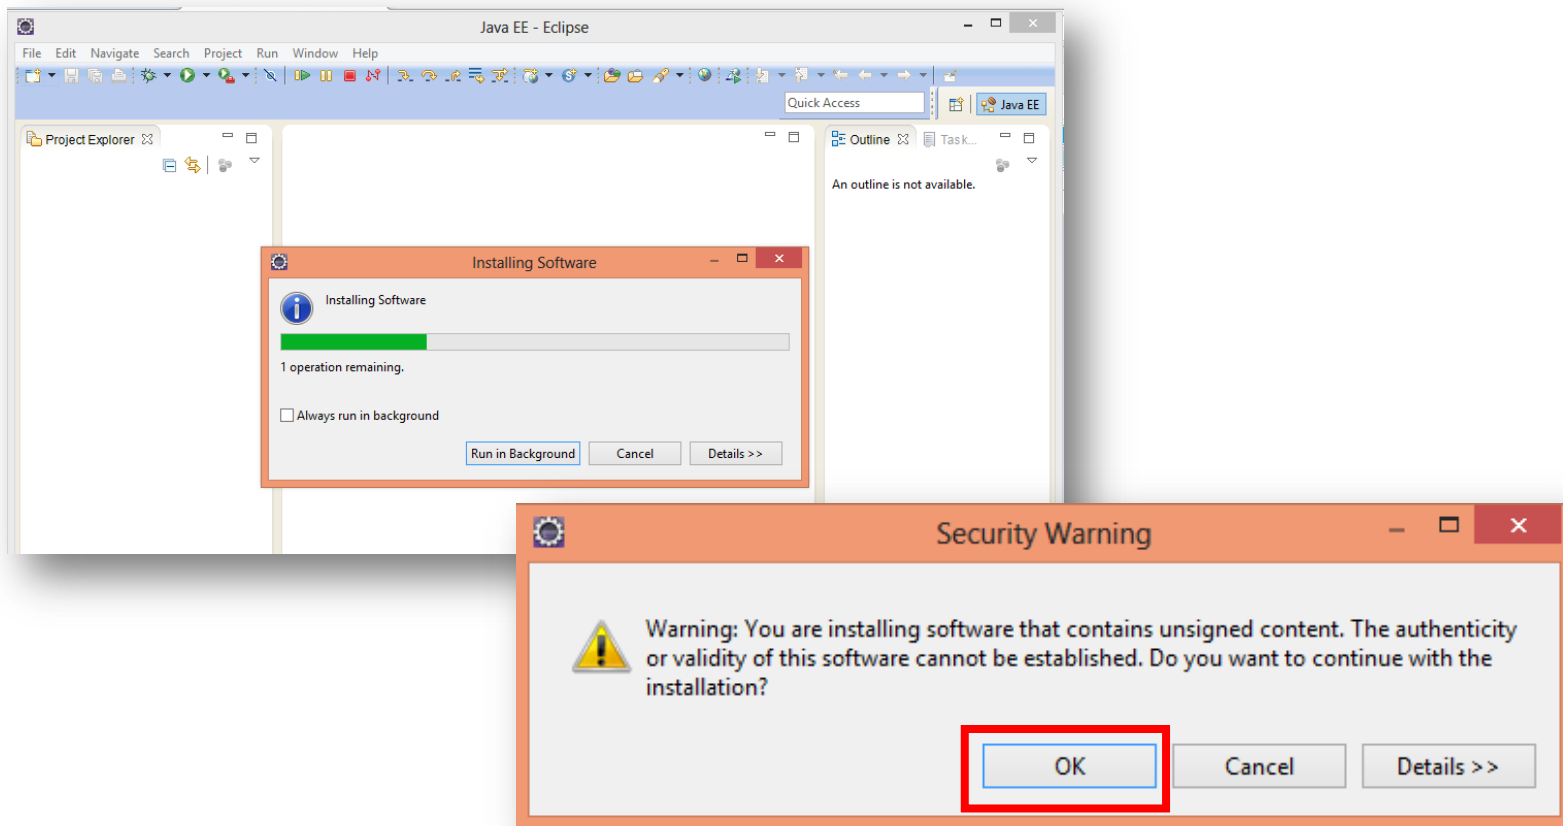

Installation 6

- **Confirm** the license agreements and choose **Finish** to start the installation.

Installation 7

- **Confirm** the installation.

Installation 8

- **Restart** the Eclipse Environment
