

SAP NetWeaver Visual Composer

Insert, Delete and Move

Description:

With this feature you can make your table view more dynamic. You can Add a row, Delete a row and Move the rows to different positions to compare each row with another one.

How To Do:

- Right click the table view and choose “Create Toolbar” option.
- Click “+” symbol to add buttons (Add, Delete or Move).
- Give the button an appropriate name.
- Choose appropriate action in the “system action” field (Insert row etc...). You can also use the Parameters option.
- Continue to create other buttons in the same manner.

Insert, Delete and Move

Design time

The screenshot displays the SAP Business Objects Designer interface during design time. The main workspace shows a workflow diagram on a grid background. The workflow starts with a 'start' node, followed by an 'Input Form' component with 'in' and 'out' ports. A 'submit' event connects the 'out' port of the 'Input Form' to the 'Input' port of a 'Bank Getlist' component. The 'Bank Getlist' component has 'Bank List' and 'Return' ports. Its 'Return' port connects to the 'in' port of a 'Bank List Grid' component. The 'Bank List Grid' component has 'out' and 'in' ports. A 'Deploy' button is visible in the top right corner of the workspace.

In the foreground, the 'Create Toolbar Buttons' dialog box is open. It features a list of 'Toolbar Buttons' on the left, including 'Copy Row', 'Copy Table', 'Copy Screen', 'Print Page', and 'Print Table'. The 'Copy Row' button is selected. The right side of the dialog is divided into two sections: 'Define Button' and 'Define Action'.
- **Define Button:** The 'Button text' field contains 'Copy Row'.
- **Define Action:** The 'Action type' is set to 'System action'. The 'System action' dropdown is set to 'Export data'. The 'Apply to' dropdown is set to '[self]'. The 'Parameters' section has three radio buttons: 'Export row' (selected), 'Export table', and 'Export screen'. The 'Action code' field contains 'EXPORT(ROW)'.
Buttons for 'OK' and 'Cancel' are at the bottom right of the dialog.

At the bottom left of the workspace, the text 'Done' is visible. At the bottom right, a 'Local' folder icon is partially visible.
