

SAP Business One 2007 integration for SAP NetWeaver (B1iSN2007)

Chapter: Installation

THE BEST-RUN BUSINESSES RUN SAP™

After completing this chapter, you will be able to:

- Explain how to download the software packages for the B1iSN2007 installation CD and the B1iSN 2007 upgrade, as well as the structure of the software packages
- Explain the deployment of B1iSN 2007 components on the B1iSN server and on SAP Business One server
- Explain how to check the environment and the prerequisites
- Explain the installation and upgrade process for B1iSN 2007
- Process the installation, upgrade and de-installation of B1iSN 2007

Part 1: Software packages

- B1iSN2007 installation CD
- B1iSN2007 upgrade

Part 2: Check installation environment and prerequisites

Part 3: Installation and upgrade process

- B1iSN server components
- SAP Business One server (B1iSN) components

Part 4: Post processing

- Check installation result
- Configure B1iSN server properties
- Configure DI-Proxy properties on the SAP Business One server

Part 5: De-installation

Part 1: Software packages

- B1iSN2007 installation CD
- B1iSN2007 upgrade

Part 2: Check installation environment and prerequisites

Part 3: Installation and upgrade process

- B1iSN server components
- SAP Business One server (B1iSN) components

Part 4: Post processing

- Check installation result
- Configure B1iSN server properties
- Configure DI-Proxy properties on the SAP Business One server

Part 5: De-installation

Software Package: B1iSN2007 Installation

1. If you are an **SAP Business One Partner** go to the [Software Distribution Center on the Channel Partner Portal](#)

Choose: SAP Business One Products -> Installations -> SAP Business One 2007 -> SAP B1 2007 Integration for NW -> Installation -> Downloads

2. If you are an **SAP Customer** go to the [Software Distribution Center on the SAP Service Market Place](#)

Choose: Download -> Installations and Upgrades -> Entry by Application Group -> SAP Business One -> SAP Business One 2007 -> SAP B1 2007 Integration for NW -> Installation -> Downloads

Structure

- Before download / extraction
1 package
 - “Installation”
- After download / extraction
3 packages
 - Content
 - SIM
 - Technology

The screenshot shows the SAP PartnerEdge Channel Partner Portal interface. The breadcrumb trail indicates the path: Home | My Partnership | Solutions | Partner Networking | Education | News & Events | Business Insider | Installation. The main heading is "INSTALLATIONS FOR SAP BUSINESS ONE". Below this, there are links for "Installations for SAP Business One", "SAP Business One 2007", and "SAP B1 2007 INTEGRATION FOR NW". The current page is titled "SAP B1 2007 INTEGRATION FOR NW" and has a sub-heading "Installation". There is a "Downloads" tab selected. The page contains instructions on how to download files and a table of available objects for download.

File Type	Download Object	Title	Info File	File Size [kb]	Last Changed
<input checked="" type="checkbox"/> ZIP	S1033752	SAP BUS ONE 2007 PL03 Integration NW	Info	103006	11.09.2008

Software Package: B1iSN2007 Upgrade

1. If you are an **SAP Business One Partner** go to the [Software Distribution Center on the Channel Partner Portal](#)

Choose: SAP Business One Products -> Installations -> SAP Business One 2007 -> SAP B1 2007 Integration for NW -> Updates -> Downloads

2. If you are an **SAP Customer** go to the [Software Distribution Center on the SAP Service Market Place](#)
Choose: Download -> Support Packages and Patches -> Entry by Application Group -> SAP Business One -> SAP Business One 2007 -> SAP B1 2007 Integration for NW -> B1 2007 Integration Content / B1 2007 Integration SIM / B1 2007 Integration Technology -> Downloads

Structure

- Before download / extraction 3 packages
 - B1 2007 Intgr. Content
 - B1 2007 Intgr. SIM
 - B1 2007 Intgr. Technology

Part 1: Software packages

- B1iSN2007 installation CD
- B1iSN2007 upgrade

Part 2: Check installation environment and prerequisites

Part 3: Installation and upgrade process

- B1iSN server components
- SAP Business One server (B1iSN) components

Part 4: Post processing

- Check installation result
- Configure B1iSN server properties
- Configure DI-Proxy properties on the SAP Business One server

Part 5: De-installation

Check Installation Environment and Prerequisites

B1iSN 2007 Server

- Prerequisites
 - Microsoft Visual C++ 2005 SP1 Redistributable Package (x86)
 - MSXML 4.0 SP2 or higher
- Environment
 - MS SQL Server release (2000 SP3 or higher)
 - Collation settings in SQL Server properties
 - Enable TCP / IP Port
 - Port number to 1433 for SQL instance
 - Database administration user / PW
- Before patch upgrade: back up B1i database and Xcellerator (folder)

SAP Business One Server

- Prerequisites
 - See <http://service.sap.com/smb/sbo/documentation>
- Environment
 - MS SQL Server 2005 or higher
 - SAP Business One release / SP / PL
 - DI-API version (according to SAP Business One version)
 - SAP Business integration platform installed (depending on deployment considerations; usually only EventSender and DI Proxy are installed)
- Before patch upgrade: back up B1i ...\SAP Business One integration\EventSender (folder) and ...\SAP Business One integration\DIProxy (folder)

Part 1: Software packages

- B1iSN2007 installation CD
- B1iSN2007 upgrade

Part 2: Check installation environment and prerequisites

Part 3: Installation and upgrade process

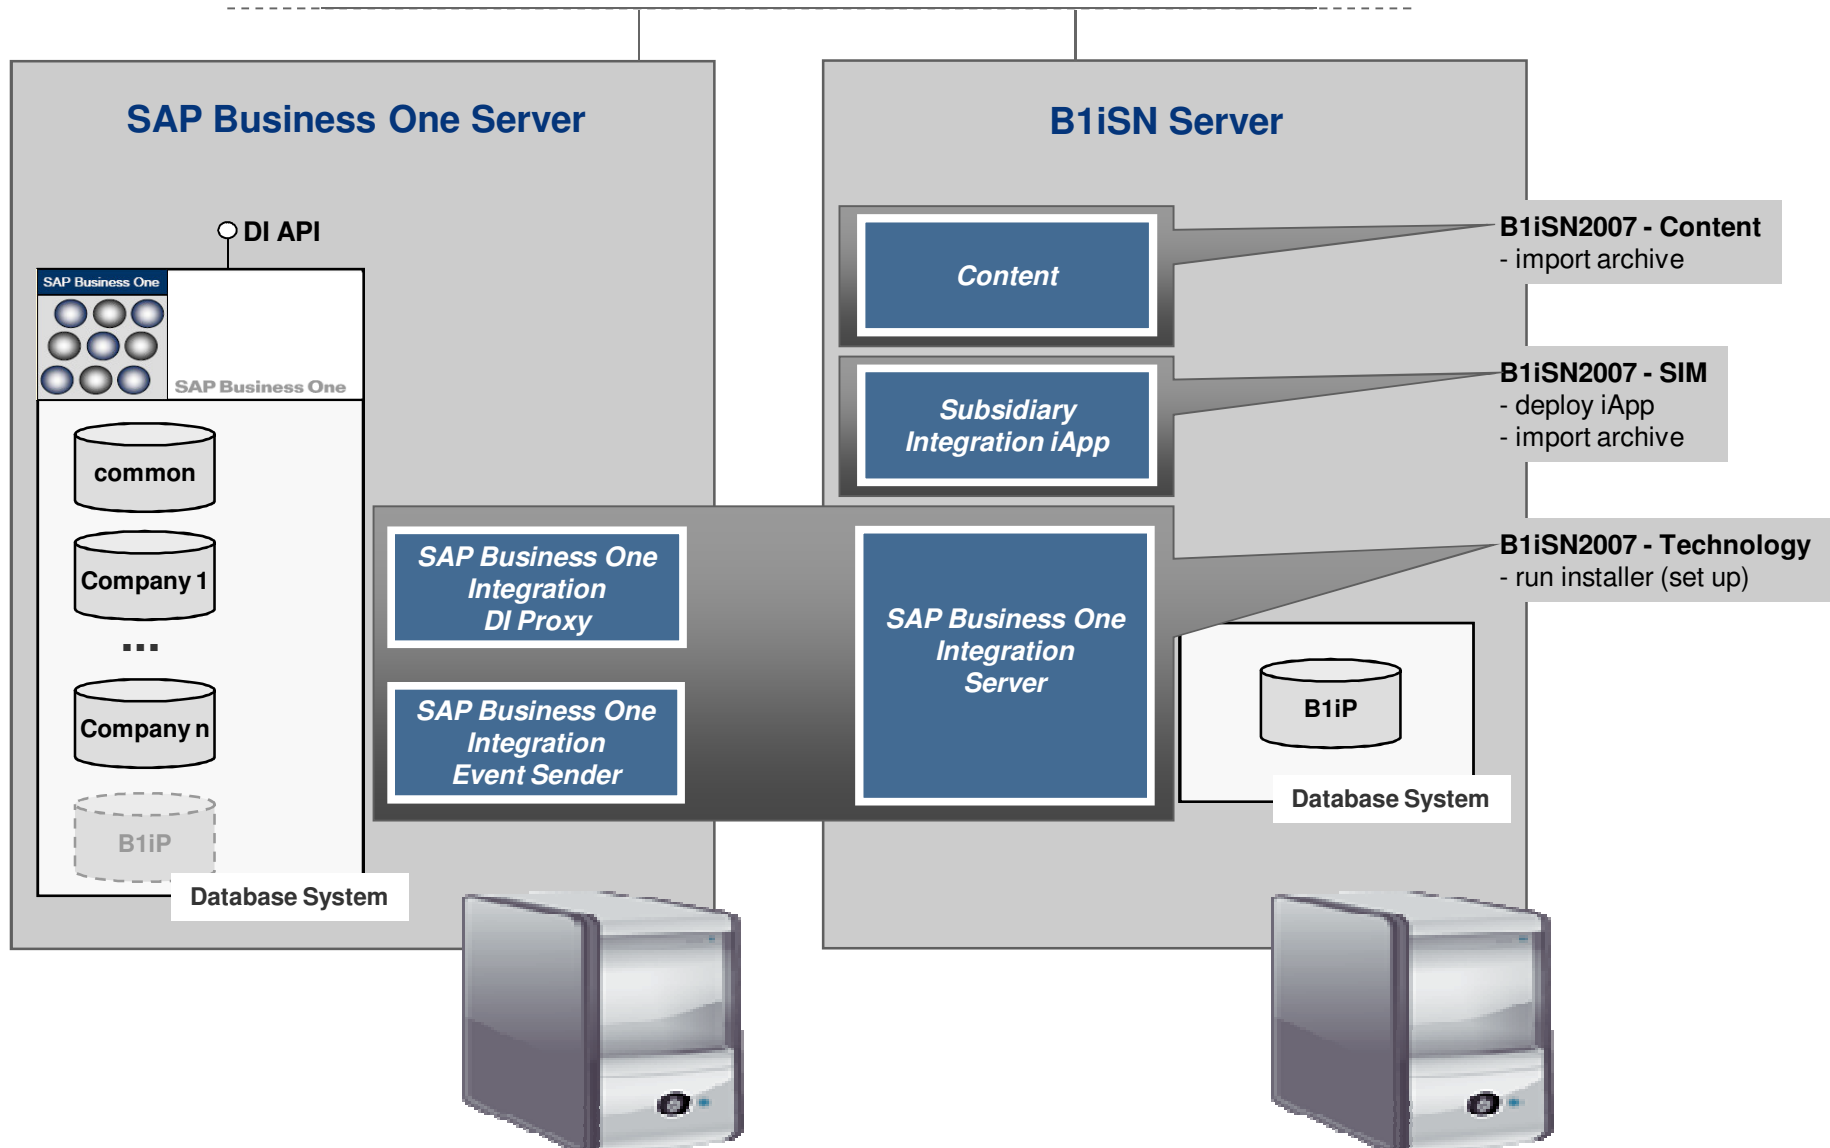

- B1iSN server components
- SAP Business One server (B1iSN) components

Part 4: Post processing

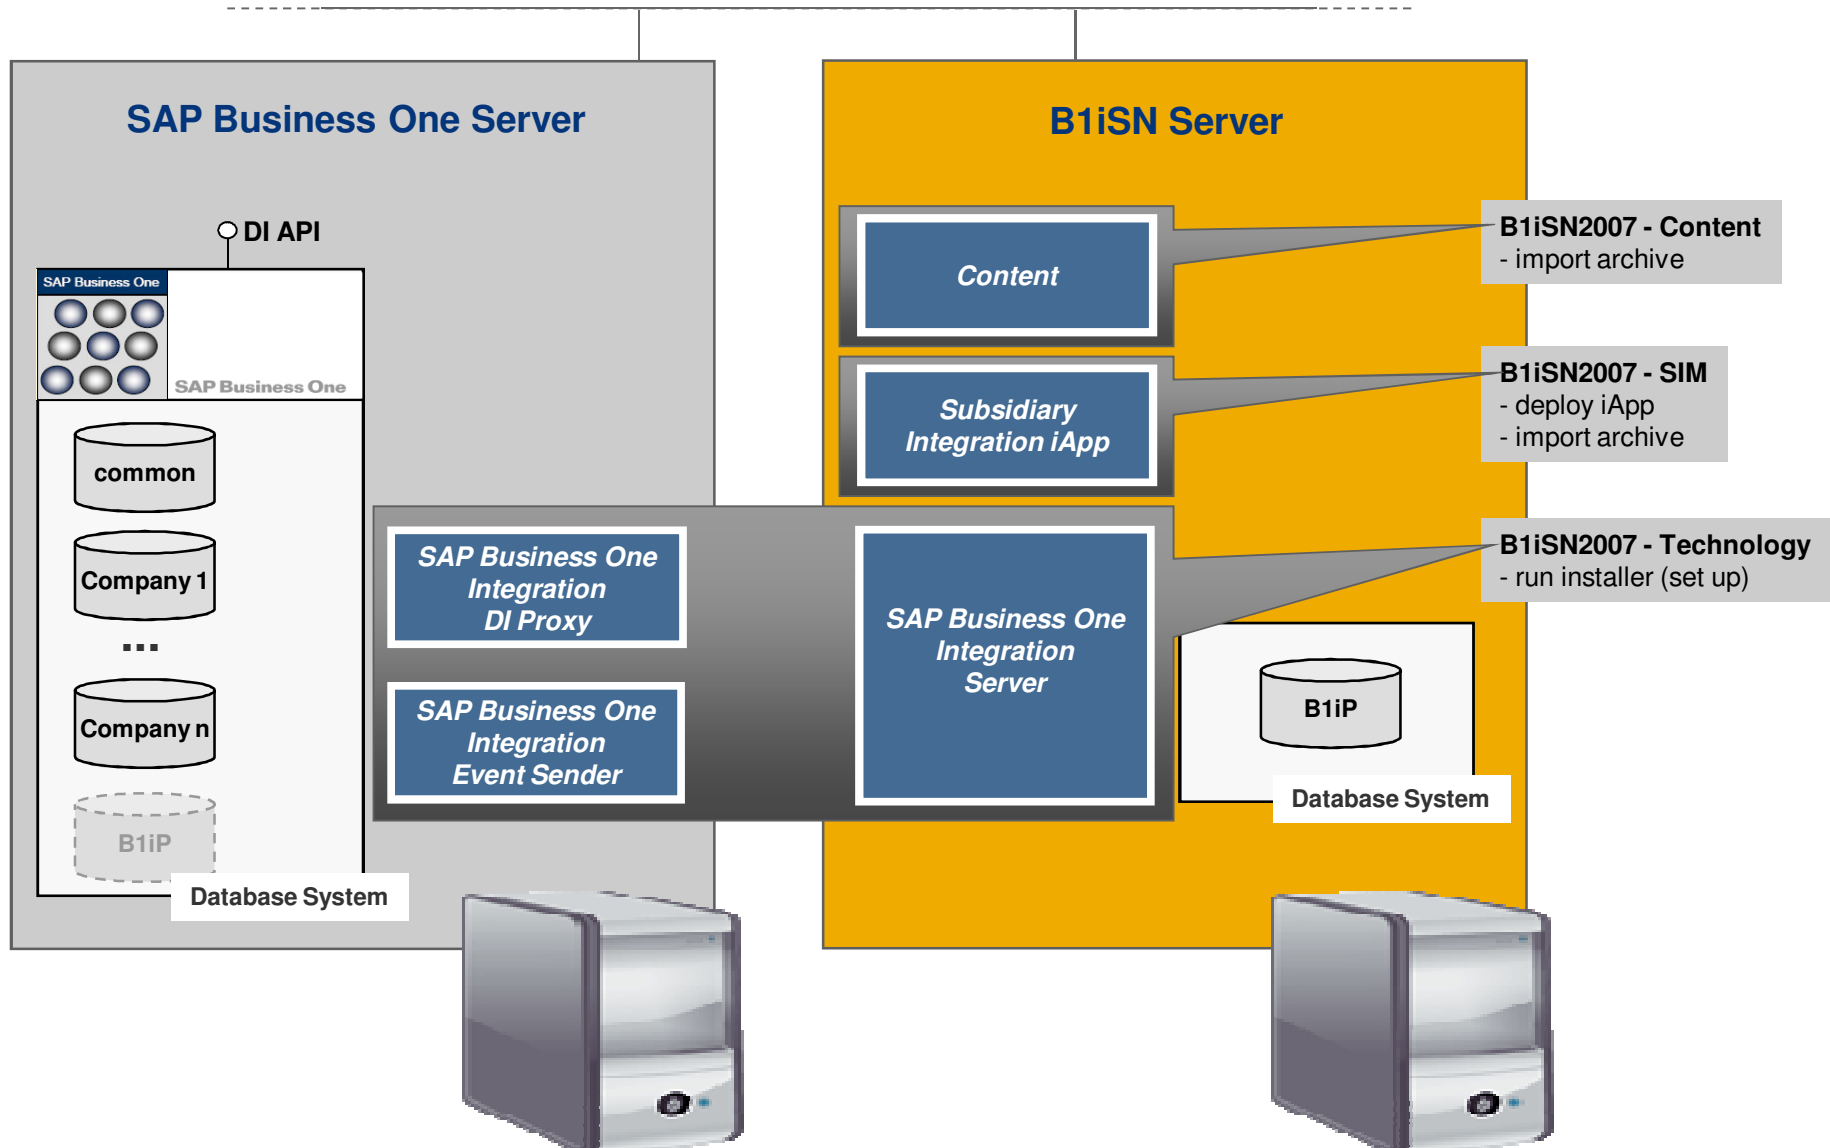

- Check installation result
- Configure B1iSN server properties
- Configure DI-Proxy properties on the SAP Business One server

Part 5: De-installation

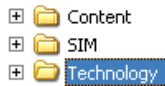

Installation and Upgrade Process: Deployment Overview

Installation and Upgrade Process: B1iSN Server Components

Installation and Upgrade Process: B1iSN Server Components

Install / Upgrade B1iSN 2007 Technology: SAP Business One integration Server

1. Run *setup.exe* from the *Technology* folder; go through the *InstallShield Wizard*
2. Select in step *Select Features* the component *SAP Business One integration Server (only)*
3. Select in the next step the *Database (version)*
4. Provide *Server, Database Name, (DB Admin) User Name and Password*
5. Finish the installation

Install / Upgrade B1iSN 2007 SIM

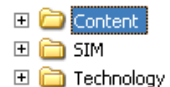

Important: Check latest information in [Patch_Readme.pdf](#) inside the package!

Deploy *Subsidiary Integration Application*

1. Start *SAP Business One 2007 integration platform – Integration Application Explorer*
2. Go to *Application Manager -> Deploy Applications ->* choose in the *Deploy* folder *B1iSN2007SIMP_03_deploy.zip -> Select Deploy*

Import additional archive(s)

3. Go to *Tools -> Import ->* choose in the *Import* folder *B1iSN2007SIMP_03_import_01.zip -> Select Import*

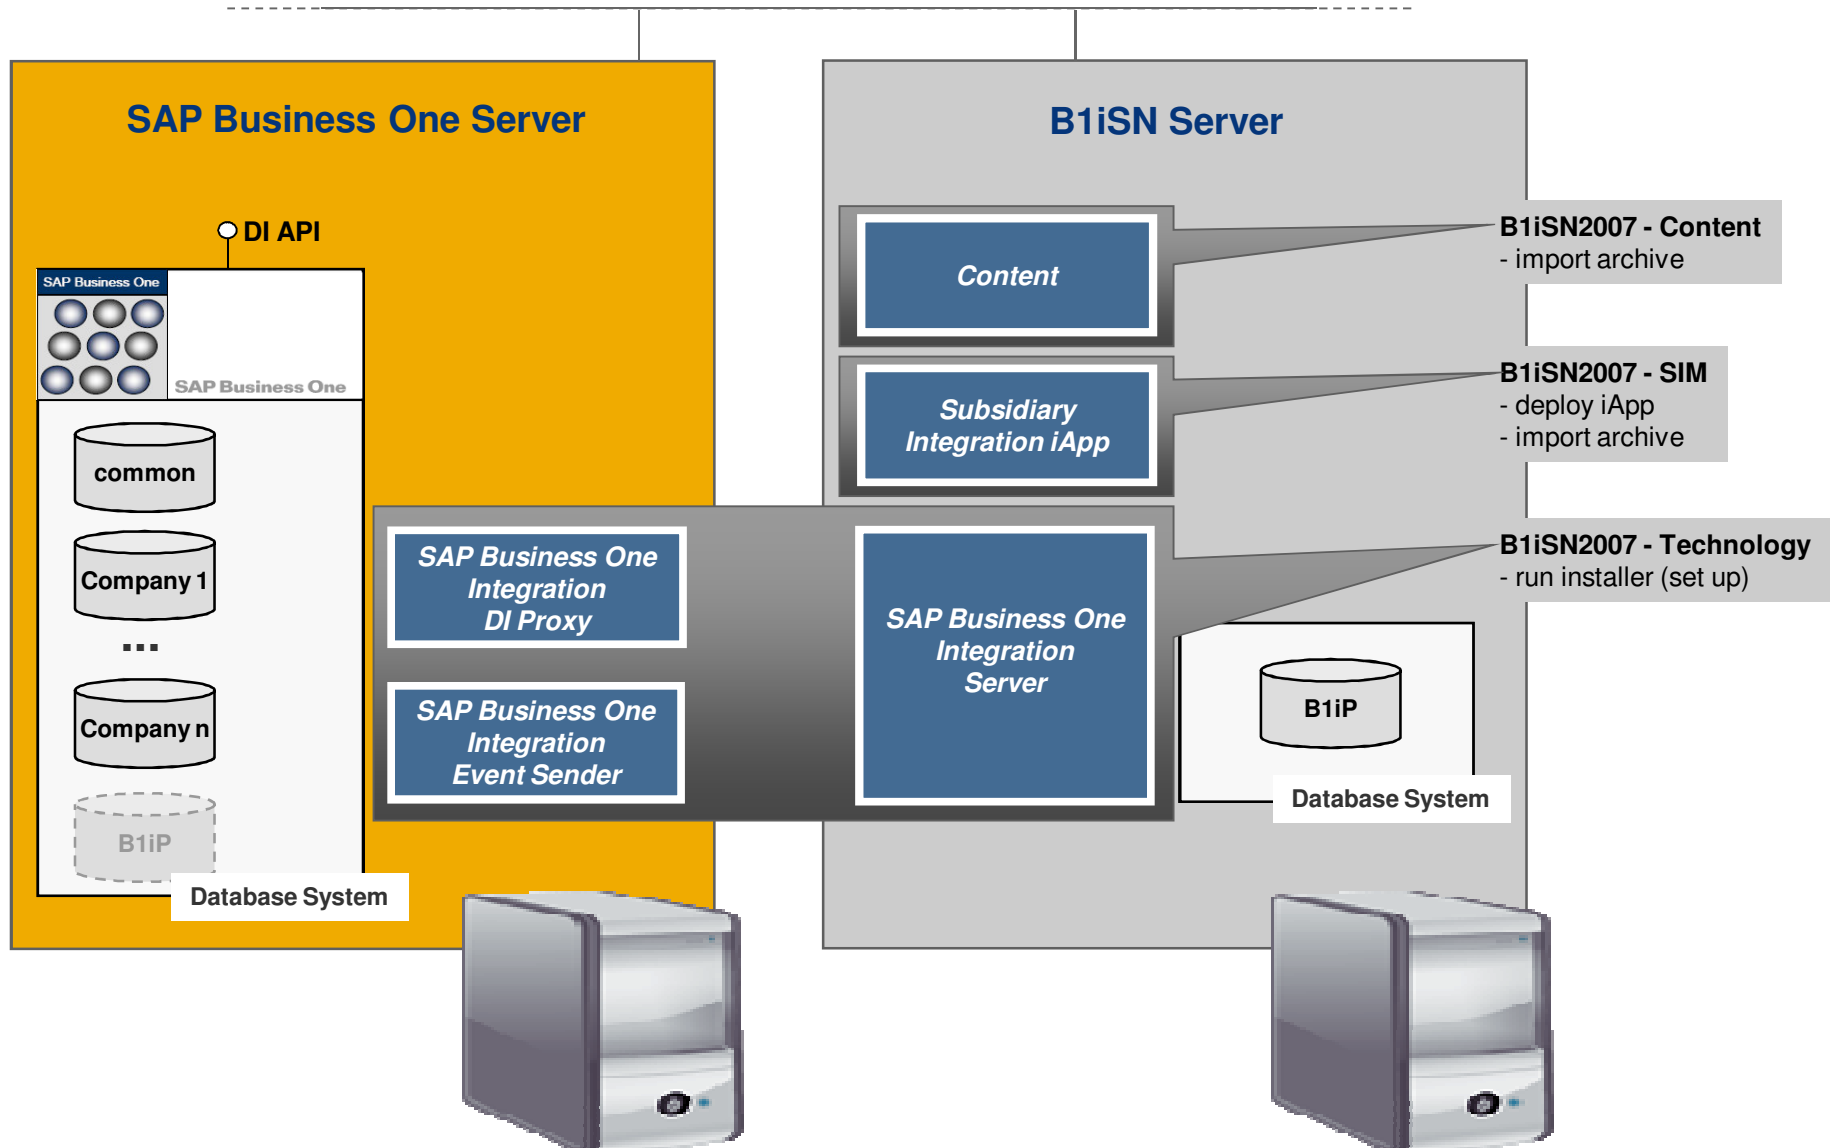

Install / Upgrade B1iSN 2007 Content

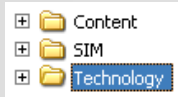

Important: Check latest information in [Patch_Readme.pdf](#) inside the package!

1. Start *SAP Business One 2007 integration platform – Integration Application Explorer*
2. Go to *Tools -> Import ->* choose in the *Import* folder *B1iSN2007CONTNTP_03.zip -> Select Import*

Installation and Upgrade Process: SAP Business One Server Components

Installation and Upgrade Process: SAP Business One Server Components

Install / Upgrade B1iSN 2007 Technology:

SAP Business One integration EventSender,
SAP Business One integration DIProxy

1. Ensure that *B1iSN2007 - Technology* folder is available on the SAP Business One Server
2. Run *setup.exe* from the *Technology* folder; go through the *InstallShield Wizard*
3. Select in step *Select Features* the component
 - *SAP Business One integration EventSender*
 - *SAP Business One integration DIProxy*
4. Finish the installation

Part 1: Software packages

- B1iSN2007 installation CD
- B1iSN2007 upgrade

Part 2: Check installation environment and prerequisites

Part 3: Installation and upgrade process

- B1iSN server components
- SAP Business One server (B1iSN) components

Part 4: Post processing

- Check installation result
- Configure B1iSN server properties
- Configure DI-Proxy properties on the SAP Business One server

Part 5: De-installation

Post Processing: Check Installation / Upgrade Result

Check installation / upgrade version on B1iSN Server

-  SAP Business One integration platform
 - Open *B1iP_Version.txt* file in the file system under
...**SAP Business One integration\B1iServer\tomcat\webapps\B1iXcellerator**
 - Version = B1iP_2008_SP<SP#>; e.G. B1iP_2008_SP05 for PL06 upgrade
-  Subsidiary Integration Application
 - Open *SAP Business One 2007 integration platform – Integration Application Explorer*
Go to *Application Manager -> Manage Applications*
 - Version: 2007.0.<PL#>

Check installation / upgrade version on SAP Business One Server

-  SAP Business One integration EventSender
 - Open *EventSender_Version.txt* file in the file system under
...**SAP Business One integration\EventSender**
 - version = EventSender_2008_SP<SP#>_HF00
-  SAP Business One integration DIProxy
 - Open *DIProxy_Version.txt* file in the file system under
...**SAP Business One Integration\DIProxy**
 - Version = DIProxy_2008_SP05

Post Processing: Configure Properties and Check Services

Configure properties

- **B1iSN Server: Xcellerator properties**
 - Open *xcellerator.cfg* file in the file system under
...\\SAP Business One integration\\B1iServer\\tomcat\\webapps\\B1iXcellerator
 - Change parameter *xcl.webdav* to 'full'; please note that this setting may be **overridden** in updates
- **SAP Business One Server: DIProxy properties**
 - open *diproxyserver.properties* file in the file system under
...\\SAP Business One Integration\\DIProxy
 - Parameters for DiProxy properties will be explained in detail in System Landscape chapter. But generally the *diproxyserver.properties* will be **overridden** with every upgrade

Check service

- **B1iSN Server:**
 - Open service panel
 - Check if *SAP Business One Integration Service* is started and startup type is *automatic*
- **SAP Business One Server:**
 - Open service panel
 - Check if *SAP Business One EventSender Service* is started and startup type is *automatic*
 - Check if the *SAP Business One DI Proxy Service* and *SAP Business One DI Proxy Service Monitor* is started and startup type is *automatic*

Part 1: Software packages

- B1iSN2007 installation CD
- B1iSN2007 upgrade

Part 2: Check installation environment and prerequisites

Part 3: Installation and upgrade process

- B1iSN server components
- SAP Business One server (B1iSN) components

Part 4: Post processing

- Check installation result
- Configure B1iSN server properties
- Configure DI-Proxy properties on the SAP Business One server

Part 5: De-installation

De-Installation: B1iSN Server / SAP Business One Server Components

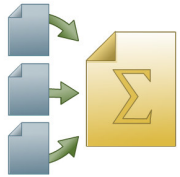

- De-install **B1iSN server** component
 - De-install SAP Business One integration Server via Add/Remove Programs administration
 - Choose *Control Panel -> Add/Remove Programs*
 - Select *SAP Business One integration Server* and choose *Change/Remove*
 - Check via Service panel, if *SAP Business One Integration Service* is removed
- De-install **SAP Business One server** component: SAP Business One integration EventSender
 - De-install SAP Business One integration EventSender via Add/Remove Programs administration
 - Choose *Control Panel -> Add/Remove Programs.*
 - Select *SAP Business One integration EventSender* and choose *Change/Remove*
 - Check via Service panel, if *SAP Business One EventSender Service* is removed
- De-install **SAP Business One server** component: SAP Business One integration DI Proxy
 - De-install SAP Business One integration DIProxy via Add/Remove Programs administration
 - Choose *Control Panel -> Add/Remove Programs.*
 - Select *SAP Business One integration DIProxy* and choose *Change/Remove*
 - Check via Service panel, if *SAP Business One DI Proxy Service* and *SAP Business One DI Proxy Monitor Service* is removed

Please ensure that all B1i related folders are closed before you start to de-install

Summary Chapter: Installation

You should be able to:

- Explain and process the deployment, installation, upgrade and de-installation of the B1iSN 2007 components
