## Introduction

This version of the document may be intermittently updated online with the latest information after the original release of BusinessObjects Data Quality XI for SAP Solutions. For the most recent version, please check the [Business Objects Customer Support site](#).

**NOTE**

Anything that is highlighted using red font indicates that it is an update, addition or correction made after the original release of the Supported Platforms document that was published with this product.

## Products

### BusinessObjects Data Quality XI for SAP Solutions

This information is specific to the SAP DQ connector version 11.6.0.

## Languages

English only.

## Supported Operating Systems

### BusinessObjects Data Quality XI for SAP Solutions

Linux platforms:

- Red Hat ES/AS 3.0 (x86)
- Red Hat ES/AS 4.0 (x86/x64)
- SUSE Enterprise Linux 9 SP1 (x86/x64)

Supported Windows platforms for Data Quality XI's Client Application Components:

- Windows 2000 SP4 Professional
- Windows XP SP2 Professional

## Minimum Hardware Requirements

### BusinessObjects Data Quality XI for SAP Solutions

The Data Quality connector for SAP requires that you have:

- RISC processor\* with a minimum of 512 MB RAM (1 GB recommended).

RFC Server Component:

- 117 MB of hard disk space.

Data Quality XI Release 2 - version 11.6.1

- All system requirements are defined within the Linux document for Data Quality XI.

\*The Data Quality XI Server is built as a 32-bit binary. It has been certified to run on either the Intel EM64T or the AMD64 chips.

\*BusinessObjects Data Quality connector software for Linux can be run on Linux 64-bit operating systems if it can reference the 32-bit operating system libraries as well as the 32-bit database and application client libraries.

### Business Objects and Linux Critical Patches

Business Objects supports and recommends installation of all Red Hat or Suse critical patches for the Linux operating systems listed above.

### Business Objects and Microsoft Critical Patches

Business Objects supports and recommends installation of all MSFT critical patches for the Windows operating systems listed above.

## Java Runtime Environment

The machine on which you install Data Quality XI for SAP Solutions must run the 32-bit version of the Java 2 Platform, Standard Edition (J2SE), version 1.4.2 or higher.

An installable version of the J2SE is not included with this package. You must acquire, install, and run the J2SE independently of this product and *before* the installation of Data Quality XI for SAP Solutions.

## Supported Browsers

- A browser is *not* required solely for Data Quality XI for SAP Solutions.

## Supported Connectivity

### Data Quality XI for SAP Solutions: Application Connectivity

Data Source	Version	Client	Repo	Source	Target
SAP CRM	5.0, 4.0	N/A		x	x
SAP R/3	4.7, 4.6	N/A		x	x
SAP ECC	6.0, 5.0	N/A		x	x
