

Integration & Certification - Integration Scenarios

Integration Scenarios - Deployment on 64 Bit [SAP NetWeaver CE 7.1 Application Server Java™ EE 5 Edition](#) (JAVA-EE-STD and JAVA-EE-ADV)

During the certification of the deployment via JAVA-EE-STD and JAVA-EE-ADV, SAP verifies that J2EE 1.4 and EE 5 Specification compliant applications from independent software vendors can be deployed and run on the 64 Bit [SAP NetWeaver CE 7.1 Application Server Java™ EE 5 Edition](#) - itself a fully J2EE 1.4 / EE 5 [compliant](#) Java application server.

Deployment is regarded as the process of installing a J2EE 1.4 / EE 5 application in the form of an EAR file (Enterprise Application Archive file) on the 64 Bit [SAP NetWeaver CE 7.1 Application Server Java™ EE 5 Edition](#) . The successful deployment of the EAR file according to certification guidelines, followed by a functional test of the application itself, leads to SAP integration certification.

For certification purposes, ISVs need to have an in-house 64 Bit [SAP NetWeaver CE 7.1 Application Server Java™ EE 5 Edition](#) installation.

For a list of already certified integrations for this integration scenario please visit the [Partner Information Center](#) and use the search functions in the tab "solution".

Technical Documentation

SAP NetWeaver CE 7.1 Application Server Java™ EE 5 Edition

A new [J2EE 1.4 / EE 5](#) specification certification is now available (in addition to the existing [J2EE 1.2 / 1.3-specification certifications](#)). The certification offering based on SAP NetWeaver CE 7.1 has now two certification scenarios which address two different levels of certification quality and harmonization.

JAVA-EE-STD 7.1 is an *entry* deployment certification verifying basic criteria.

JAVA-EE-ADV 7.1 is a *high quality* level product certification that takes into account special capabilities of SAP NetWeaver CE 7.1 in addition to what is already contained within the JAVA-EE-STD 7.1 certification scenario.

For a brief overview, refer to the [EE_5_Documentation_and_Test_Catalog](#) (this is the [EE_5_Documentation_and_Test_Catalog.pdf](#) file).

Detailed information on JAVA-EE-STD 7.1 and JAVA-EE-ADV 7.1, refer to (this is the [EE_5_SDN Article.pdf](#) file).
