

Quick View Insider: How Do I Get Bold Figures in My Charts?

Applies to:

SAP SNC (Supply Network Collaboration) release 7.0 and release 7.0 enhancement pack 1

For more information, visit the [Supply Chain Management homepage](#).

Summary

This article explains how fonts on your IGS impact quick view charts.

Author: Cora Zimmermann

Company: SAP Labs, LLC

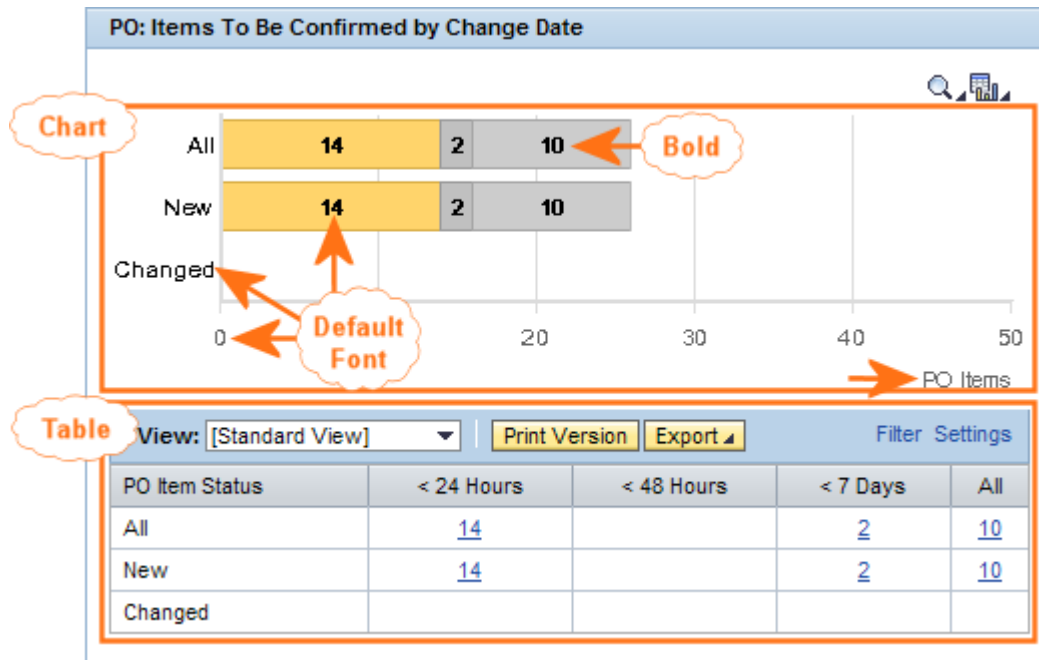

Created on: 2 June 2010

Author Bio

I have been part of the SNC development team in Palo Alto since 2004. Overall I have been a developer at SAP in Germany, Japan, and California since 1997 and at Software AG in Germany since 1989. I hold a masters degree in industrial engineering and computer science.

If you've been reading the quick view insider articles, you may have noticed that the charts in our screenshots display bold figures in the bars and you may find them easier to read:

Quick view generates charts using your IGS (internet graphics server). To use a different font style, such as bold, the IGS needs to have a default font installed. The default font will also apply to other texts in the chart, such as the key figure labels.

For more information on how to install fonts on the IGS refer to note **1028690**.

Note: The font is only applied to the charts, not to other screen elements.

If you run a central IGS, consider the other applications it services.
